

# Bix

DESIGN METRO DESIGN GROUP

Bix offers a system of seating and tables that can create a variety of lounge-based applications that address group or individual work needs. Each application provides convenient connections to power, voice, and data.

Group meeting area created with Bix furniture offers a sense of enclosure without walls for collaborating and provides social and physical comfort.

Side table offers a freestanding mobile tablet surface. It is available in vinyl or leather.

Back screen is available on select units to provide privacy and divide space. It is upholstered.

Seat is upholstered.

Arms are available on select seating units. They are upholstered.

Back is upholstered.

Sled base on a lounge chair is finished with paint. The back of the sled base does not extend past the chair back.

Tablet provides a surface for presenter's notes, laptop computer, or wireless mouse.

Leveling glides adjust for installations on uneven floors. Adjustability range is 3/4".

Service tray is optional.

Projection screen is available on podium seating for presentations and to divide space. It also accommodates Steelcase huddleboards.

Bolster is upholstered.

Storage drawer is available on select models to store equipment or presentation tools.

Face lock, keyed randomly, is standard on storage drawers to secure the items stored in it.

Legs and base are constructed with steel tubing and steel plates for structural integrity. They are finished with paint. They are either inset under the seating unit (sled base) or slant off the back of a unit (legs).

DESIGN METRO DESIGN GROUP

## Product Details

**Individual work-booth area** provides an alternative to a confined workstation. It offers a semi-private setting for temporary tasks that require projects to be spread out. It is created by grouping two straight sectionals or lounge chairs with a 27"H work-booth table.

*Tip: Extended corner sectionals or straight sections with arms should not be used in a work-booth application because access to the seating area is obstructed.*

**Lounge chairs** are available with or without upholstered back screens. Models with upholstered arms are also available.

**Sled lounge chairs** feature a compact base that is designed for small spaces or to be used flush against the wall. They are available with or without upholstered arms or a tablet arm.

**Sectional seating** is offered in corner, extended corner, and straight units to provide a variety of configurations. They are offered with or without back screens and with or without arms. All sections include an integrated ganging device. Corner sectional units are handed. Handedness is determined by the location of the back screen or back support legs.

**Bench** provides a backless seating option. It can also be used as an alternative soft occasional table. An open storage space that is accessible from either side is available for storing magazine and media equipment. Bench can accommodate a service tray.

**18" seat height** is an available option on all lounge, sectional seating, bench, and podiums. This option should not be used in conjunction with work booth tables. It allows a higher sit for healthcare applications.

**Podium** serves as a focal point for lounge-based meeting spaces and provides comfortable seating for the presenter. A lockable storage drawer secures projection equipment or presentation tools. A fixed tablet arm provides a surface for presenter's notes, laptop computer, or wireless mouse. Podium can accommodate a service tray.

**Integrated projection screen** is available on select podium units for slides or projected digital media. It can also be used to divide an open space. The screen is a fine white mesh that allows light to filter through when the screen is used as a space divider. It also accommodates a Steelcase huddleboard.

**Service tray** rests on benches and podium units for food service or to support projection equipment in a lounge-base meeting space. A dark gray vinyl mat provides a non-slip surface.

**Multiple fabrics** can be specified on lounge, sectional, and podium seating units for an additional fee per specified fabric.

- Seat cushion and sides of seat cushion - no additional fee
- Back cushion and sides of back cushion - additional fee
- Back screen (if selected) - no additional fee
- Armrest (if selected) - no additional fee

► See *Bix Multi-Fabric Diagram and Yardage Request Form*, page 118.

*Tip: Fabric for the seat and back is specified separate from the back screen, if selected. For a monochromatic look, specify the same fabric for both the seat and back and back screen.*

**30"W corner sectional units** are available with the two fabric direction options for the seat - railroaded or cut-right. Seat fabric direction is determined by its relationship to the back screen or back support legs.

*Tip: Seat fabric on extended corner and straight sections is always railroaded.*

► Page 120

**Bridge tables** integrate with Bix sectional seating to create a range of lounge-based applications and are available with two top shapes - rectangular and corner. Translucent screens are available to create a sense of visual privacy for open space environments. The worksurface is available with or without a grommet and an optional power, voice, and data module. The rectangular table features an integrated 18"W x 12½"H tilted display surface for magazines or project folders.

*Tip: Bridge tables are used with sectional seating. They do not attach to benches or podiums.*

**Corner bridge tables** are offered in 20" table height option to be used with the 18" seat height option only.

**Occasional tables** are freestanding 18"H tables that can be used a variety of lounge applications. They are available with a round, square, or rectangular top. The tops are available with or without a grommet and an optional power, voice, and data module.

Plastic edge Wood edge

**Edge detail** is available in either plastic or wood edge.

**Work-booth tables** are freestanding 27"H tables that are used with sectional seating to create a work-booth configuration. They are available with either a round or rectangular top. The tops are available with or without a grommet and an optional power, voice, and data module. Base features a low profile for foot clearance.

**Side table** offers a freestanding, mobile tablet surface. The tripod base allows it to be positioned close to a seating unit. The top is available in vinyl or leather.

**Back screen** is available on lounge and sectional seating. It is fully upholstered with a zipper detail. However, it is not removable. Back screens must be ordered with the chair. It cannot be retrofitted to an existing backless lounge chair or seating sections.

**Connections**

**Integrated ganging device**, included, connects sectional seating units together in the field. It is not intended for user reconfiguration.

**Bridge tables** connect on both sides between sectional seating units. A rectangular top is used in an in-line configuration. A corner top is used in an L-shape configuration. *Exception: Bridge tables cannot attach to a seating unit with arms.*

**Lounge chairs** are independent and are not intended to connect to sectional units or bridge tables.

▶ See How To Plan, page 104

**Wiring & Cabling**

**Bridge tables** are available with a grommet, factory installed, to allow cords and cables to pass through the top. Wire management clips, attached to the underside of the top, are used to route cords and cables. A power, voice, and data module can be inserted in the grommet.

**Occasional and work-booth tables** are available with a factory-installed grommet located over each column and base to allow cords and cables to pass through the top. A power, voice, and data module can be inserted in each grommet location.

**Column and base of occasional and work-booth tables** are used to route and conceal cords. The cords pass through the worksurface down through the column and out through a mouse hole in the base plate. Bases have mouse holes facing four directions so cords can be directed to power and communication sources. Cords should be routed through the concealed channels and out the mouse holes during the installation of the table base.

**Hole at the top of each column** allows cords to be routed between tables directly below the worksurfaces. Wire management clips are included for routing purposes.

**Power, voice, and data module** can be installed in the grommet locations to bring power and communication to the worksurface. Each module is equipped with two 110volt electrical outlets and one snap-in voice/data module insert consisting of dual CAT 5 RJ45 universal T568A/B jacks. It is UL listed and CSA certified. It has a 6' power cord. For additional data/voice outlet options, please contact Metro customer service at 1.800.627.6770.

**Hardwired applications** require on-site modifications by a licensed electrician following all local electrical code requirements. *Tip: The base will accommodate a 3/8" diameter flex-conduit.*

## Programs & Services

**Fire code seating (FCS) modifications** are available to meet CAL TB133 requirements.  
▶ See page 11.

**Customer's Own Material/Leather (COM/COL) Program** is available.

▶ See Surface Materials for additional information, page 418.

*Note: Due to unusual upholstery conditions inherent in the design of Bix, not all seating fabrics may be specified. Refer to [www.metrofurniture.com](http://www.metrofurniture.com) for a list of pre-approved Designtex fabrics on Bix. Pre-approval is required for all COM fabric. Also, due to the geometric shapes and flat planes of the Bix design, seat fabric tautness will vary depending upon the amount of stretch in the fabric. Leather naturally stretches with use.*

# Bix

DESIGN METRO DESIGN GROUP

# Bix How To Plan

DESIGN METRO DESIGN GROUP

## Configuration guidelines — work settings with podium, benches & bridge tables

A variety of configurations may be created to support lounge-based meeting spaces using the Bix podium as a focal point. Benches and bridge tables support media projection equipment. As projection equipment varies, you will need to verify the distance required between the equipment and projection screen when planning your space. The examples below are suggested layouts.

## Configuration Examples

# Bix How To Plan

DESIGN METRO DESIGN GROUP

Configuration guidelines –  
 work-booths with 27" high tables  
 Two straight sections are grouped with 27" high tables to create work-booth applications.  
 Lounge chairs may also be specified with 27" high tables to create a two-person work-booth.  
 Facing seats edges should be spaced 24"–27" apart from one another to accommodate leg clearance

and maintain the correct user relationship to the work surface. The table base is centered within the 24"–27" space.

## Configuration Examples

Lounge Seating

Configuration guidelines –  
 work settings with 18" high tables  
 A variety of configurations may be created by combining sectional seating and 18" high tables. The Bix system is built upon

a 12"/24" dimension module for planning. Seats are 24" wide. Rectangular tables are 24" deep. Tables are spaced 12" from seat edges. A 24" opening should be maintained for large 360° group enclaves.

## Configuration Examples

Configuration guidelines – DON'TS

- 30" wide corner sections are not intended to be freestanding. 30" wide corner sections must always be connected to an adjoining 54" wide extended corner or straight section, using the ganging hardware provided.

- Individual lounge chairs are independent elements not designed as a module within the seating system. The lounge chair seat is wider than the 24" system module and lounge chairs do not include ganging hardware. Bridge tables also do not connect to lounge chairs.

- Do not create a U-shaped configuration with a 27" high rectangular table. Access to the closed end is difficult and the table edge is too far from reach for the user.

- Do not use 54" wide extended corner sections or straight sections with arms to create a work-booth configuration with 27" high tables. Access is obstructed.

- Bridge tables must be connected on both sides to a seating section.

- Bridge tables do not connect to seating sections with arms. Seating sections do not gang with arms at the seam.

- Do not attach 30" wide corner sections to a corner bridge table. This application does not allow enough leg room for two users.

- Bridge tables do not attach to benches or podiums.

# Bix How To Plan

DESIGN METRO DESIGN GROUP

## Orientation & fabric direction

Corner units are handed from a facing position. Handedness for 30"W corner units is determined by the location of the back-screen or back support legs. Location of back-screens should be consid-

ered for each configuration. In order to create a consistent pattern across seats in the configuration, 30"W corner units are available with two seat fabric direction options. Seat fabric direction is deter-

mined by its relationship to the back-screen or back support legs. Seat and back fabric on 54"W extended corner and straight sections is always railroaded.

Examples below assume a striped patterned fabric:

### 30"W Corner Sections

Arrow indicates direction of the pattern on the roll

\*Fabric yardage is based on non-directional/solid fabrics. use conversion chart on the following page for repeat/printed fabric yardage.

**Multi-Fabric Yardage**

DESCRIPTION	STYLE NUMBER	COM YDS*			
		SEAT CUSHION	BACK CUSHION	ARM(S)	BACK SCREEN
Podium with left tablet	BP72TX	3½	2½	N.A.	N.A.
Podium with right tablet	BP72XT	3½	2½	N.A.	N.A.
Podium with projection screen and left tablet	BPP72TX	3½	2½	N.A.	N.A.
Podium with projection screen and right tablet	BPP72XT	3½	2½	N.A.	N.A.

\*Fabric yardage is based on non-directional/solid fabrics. Use conversion chart below for repeat/printed fabric yardage.

**Non-standard fabric requirements**

Yardage requirements shown are based on non-directional 54"W material applied railroaded. Coalesse will apply fabric railroaded unless instructed otherwise on the dealer's purchase order. The following conversion chart should be used to determine yardage requirements when COM has a repeat of 2" or more. Please contact Coalesse customer service for a yardage quotation if the fabric is less than 54" wide, has a repeat of more than 24", or if the fabric must be cut-right.

**CONVERSION CHART**

PRODUCT	REPEAT		
	2"- 8"	9"- 14"	15"- 24"
<b>Bix</b>	15%	30%	75%

Yardage quotations will also be provided for order of 10 or more pieces.

**Pattern matching on Bix**

Due to Coalesse's high standards for pattern matching, we reserve the right to apply the following upcharges for extra labor incurred by a pattern or material that poses such challenges:

<b>Lounge or seat</b>	\$100 U.S. net per piece
<b>Backscreen</b>	\$50 U.S. net per piece

Customers will be informed if an upcharge will be applied to their order during the approval process. Should Coalesse receive an order without prior approval, it will be held as pending until the customer accepts such charges. The upcharge will be applied per item where applicable.

**For Canadian Pricing**

Multiply U.S. Price by the Canadian price factor.

► See page 1 for details.

**Cutting direction guidelines**

Cutting direction is based on the fabric width and the way the fabric is cut from the roll and applied to Coalesse products. There are two cutting directions: railroaded or cut-right.

**Horizontal or railroaded** (across roll, warp horizontal) means fabric is cut across the roll; selvages are on the top and bottom.

**Vertical or cut-right** (down roll, warp vertical) means fabric is cut in the same direction it is woven; selvages are on the left and right sides.

Coalesse reserves the right to railroad or apply fabric according to weave unless instructions specify otherwise. Fabrics are railroaded when possible to avoid seams in large upholstered areas and/or single cushion units. If a fabric is questionable, a cutting of adequate size showing full repeat (if any) should be sent to Coalesse for a fabric requirement quotation.
