

Drive®

The Drive chair puts you in control of your comfort. Ergonomic features and easy adjustability make Drive a smart choice for a good value.

Work Chair
with height, width and pivot adjustable
arms; upholstered outer back shell

Work Chair
with height and width adjustable
arms; plastic outer back shell

Ergonomic Features

- Adjustable seat height fits a wide range of people
- Seat slides forward or back to adjust the seat depth for different leg lengths
- The seat can be tilted into three different angles to avoid pressure on the back of the legs
- A tension control increases or decreases the chair's resistance when you recline
- The chair's backrest reclines fully, but it can be locked using the upright back lock
- Lumbar support adjusts up or down to fit your lower back
- Three different arm styles offer various adjustments for proper arm support

Options

- Standard arms are height and width adjustable
- Optional ergonomic arms are height, width, and pivot adjustable
- Optional task arms are available as height adjustable or fixed non-adjustable
- Armless version also available
- Outer back shell available in plastic (standard) or fully upholstered

Quality

The Drive chair is certified as a low-emitting product, helping to preserve indoor air quality. Built for a long life, it's backed by the Steelcase North America Lifetime Warranty. Drive chair is tested to support 300lbs and is approved for multi-shift (24/7) applications.
