SL

## Specifications

**Certifications** ETL and CETL listed for wet location, direct burial, and concrete pour. Also meets IP65 standard.

**Fixture Housing** Injection molded Ryton™ composite material, structurally reinforced with glass fibers. Superior resistance to ultra violet degradation and corrosion resistant in harsh environments. 1/2" NPT adjustable nylon knuckle with strength support against vertical displacement. The knuckle provides 135° vertical and 360° horizontal adjustability. Stainless steel screws are used as standard.

**Lens** Clear flat tempered glass.

**Lampholder** Porcelain 4KV pulse rated medium base, for HID and Incandescent lamp source.

**Options** Cast aluminum junction box with 1/2" NPT opening at top and two 3/4" NPT conduit entrances on bottom. Other options available. See product order guide.

**Composite Ballast Housing** Compression molded Rhinolite™ composite material, structurally reinforced with glass fibers. Superior resistance to ultra violet degradation and corrosion resistant in harsh environments. 10-24 stainless steel cap screws and sealed with high temperature silicone gasket. Supplied with two 3/4" NPT conduit entrances and separated from the ballast compartment by the anti-wicking chamber hermetically sealed with high temperature sealing compound. (Supplied with HID fixtures).

**Finish** Black or Bronze standard.

**Safety** Caution: Care should be taken when specifying fixtures for use in pedestrian areas to avoid problems that may be caused by high lens temperatures. Consult factory for more information.

**Warning** Caution: Care should be taken not to install in-ground ballast housings in areas where water can stand for prolonged periods of time. Sufficient drainage must be provided to avoid problems. Consult factory for more information.
