

Itsa™ Chair

An essential task chair,
exceptionally suited
to everyone.

Kimball® Office

Itsa™ model K38DD with Soundbyte Heatwave; shown with Xsite® and Footprint®

Delivering all that is necessary in a thoughtful, trim form.

Fundamentally, Itsa is designed to address the basics of everyday task seating. Yet in this simplicity of purpose, we've created a profoundly budget-friendly chair with the versatility to conform to any body type and all settings. From individual desks, to team spaces, to a place at the conference table, Itsa delivers value while meeting your most vital needs: straightforward aesthetics, healthy support, easy ergonomic adjustments, and choices in style.

Even the frills have a practical function.

- 1 Backrest** is made of breathable dual-sided black mesh, contoured to cradle the user's spine and support the back in the lumbar area.
- 2 Seat** cushions for the Itsa 1.0 and 2.0 models are shaped for optimal seated support, including a contoured "sit spot" and waterfall front edge. All Itsa models are comfortable from the moment you sit down and throughout the day.
- 3 Pneumatic seat-height adjustment** allows the user to adjust seat height from 18"-22½" for Itsa 1.0 and from 16"-20½" for Itsa 2.0.
- 4 Five-star base** is constructed of rigid black textured nylon, which is scuff-resistant, with black, 55mm hard double-wheel casters.
- 5 Seat slider option** lets the user increase seat depth by 2 inches. Available on all Itsa models.
- 6 T-shaped arms** are height adjustable. Itsa 1.0: 7 positions over a 2¼" height range. Itsa 2.0: 5 positions over a 2¼" height range.
- 7 Tension adjustment** can be adjusted while seated, and accommodates users from 95 to 235 lbs.
- 8 Synchronous mechanism** allows the chair seat front to lower one degree for every 2.3 degrees back tilt; 21 degrees maximum back recline.
- 9 Knee-tilt mechanism** allows seat and back to remain at a constant angle to each other when reclining. Perfect for general seating and conference room applications.
- 10 Backrest lock with anti-kickback** (on synchro-tilt models) allows you to lock the back of the chair upright or in any reclining position. The anti-kickback feature releases the mechanism for a smooth return to upright position.
- 11 Upright back lock** (on knee-tilt models) allows the back to be locked only in a full upright position.
