The process by which Sensuede is created is highly eco-efficient, and employs an advanced chemical recycling process. This process actually reduces the carbon footprint, using less energy than needed to manufacture virgin polyester.

Sensuede is an especially eco-aware product, made with special water-dispersed polyurethane, which eliminates the need for use of highly toxic organic solvents. (Most other man-made suedes are manufactured with these harmful substances).

Sensuede is certified for OEKO-TEX Standard 100 and ISO 14001.

There may be variation in color, texture and finish between the sample shown and the actual product.
