

Care 20

MAINTENANCE INSTRUCTIONS

Cleaning Code W: Clean only with water-based solution, do not over, do not use solvents

- Quickly blot out fresh spills with a white absorbent cloth immediately as stain occurs.
- Frequent wiping with a clean, damp, soft lint-free cloth is acceptable to remove everyday dirt, dust and smudges.
- Stain residue can be removed with small amounts of a mild soap (such as Ivory) and water.
- Do not over wet surface.
- This product contains an "Easy clean" finish which allows for the use of a damp cloth to wipe gently. Aggressive scrubbing can damage the surface, so great care should be used when wiping.
- Pre-test the cleaner in a less visible area before using, and be sure to not over-saturate surface. Blot out the excess solution with dry, clean cloth.
- Consult with a professional cleaning service for more difficult stains or when overall cleaning is needed
