

DESCRIPTION

The harmony of the shapes, colour and textures join together in a retro-futurist inspired design. In Estudio Arquea's view, Art is an arch in evolution that has developed a strong sculptural character. The curvature of its structure conforms to the human anatomy to provide maximum comfort. The density of each of its cushions is different, in order to increase the comfort. The optional pouf enhances the piece.

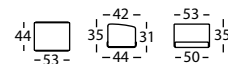

TECHNICAL DATA

Structure is high-frequency pressed and laminated beech.
The seat cushions, back and lumbar cushions are made with HR Ultracel foam of different densities covered with fibre.
The metal base can be black or white lacquered.
The pouf has PVC coaters.
The cushions are removable and can be upholstered in any material (fabric, leather or synthetic leather).
