

**DESCRIPTION**

Capas is a collection of auxiliary tables made of ash and ceramic. The use of quality materials has been a goal in itself, not only for warmth, but because we seek products that keep us in contact with nature.

Versatility was also among the objectives of Ferran and Oscar, so Capas reaches the market as a set of colours, textures and sizes, capable of adapting to all needs. The freshness and simplicity of design contrasts with the strength and durability of a product whose technical characteristics are exceptional. This contrast increases the recreational component of the collection.

**TECHNICAL DATA**

Ash wood structure.  
3 mm thick Techlam® porcelain top.
