

DESCRIPTION

Is it a rocking-chair or a hammock? Why shouldn't we reinvent it? The challenge was to achieve an unconventional but comfortable product based on the traditional rocking chair. We finally did it, since Jeu has its own identity and won an award during the XI International Design contest organised by CETEM (Technological Centre of Wood and Furniture in the Region of Murcia). It is sensuous thanks to its curves and highly expressive thanks to the padding of its structure. Jeu means toy and it is a piece created for our entertainment. The base serves as a lever to take momentum.

TECHNICAL DATA

Solid wood structure covered with foam.

The structure is fitted with NEA webbing and is covered with HR Ultracel foam.

It has DM pressed base, lacquered in black and with a protective layer.

Jeu does not have a removable cover and cannot be upholstered in leather.
