

DESCRIPTION

Lagos balances a robust structure with a simple modulation. It is a precise and calculated design with recognizable presence. The individuality is expressed by its voluminous arms and the line which delineates them. As an option, it can be combined with extra back and decorative cushions.

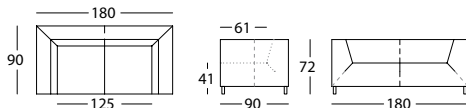

TECHNICAL DATA

Solid wooden structure covered with foam.
The seat structure is fitted with NEA webbing.
The inner seat, back and arms are made with high resilience HR Ultracel foam of different densities.
It has chromed legs.
The structure is fixed; covers are not removable.
