

## DESCRIPTION

In search of formal purity, Ximo Roca has been seduced by geometry in its purest form and has created a cubic armchair for Sancal. Quadrat has been specifically designed for the contract world. The compact design and the high quality of its frame, which is injected in cold foam, guarantees the durability of this product and makes it suitable for collective spaces which are subjected to intensive use. The legs are sled-shaped and it is possible to choose between different finishes: satin stainless steel, black or white. This easy chair is complemented with two tables that allow multiple fixed combinations. One easy chair can be joined to another by using any of the tables. In order to join them, it is only necessary to screw a little piece to the small armchairs on which the tables are held.

## TECHNICAL DATA

Solid wooden structure.

Arms and feet structure in stainless steel billet or lacquered steel.

Backs, seats and arms injected with HR cold-moulded foam.

The inner back cushion is made with HR Ultracel foam covered with thermofused polyester fibre and mesh inner cushion cover.

The feet have felt base in order not to scratch the floor.

The tables are made of ash wood.

Quadrat can be upholstered in fabric, leather or vinyl.

It has a fixed structure; only the back cushion is removable.
