

FLOW TABLE

(Designer J. M. Massaud)

Rectangular tables

Frame

Legs made of die-casting aluminium and central support bar (standard length 160cm) with an elliptical radius section made from extruded aluminium.

The frame, with adjustable feet, is lacquered in gloss black or white.

Tops

- in 15 mm thick tempered clear glass
- in 15 mm thick tempered extra light glass
- in safety glass (8+8mm), smoked grey.
- in arabesque Carrara marble, thickness 20 mm, with anti-stain treatment.

As a natural material, marble may show different veins and chromatic patterns.

Variations on marble surfaces may occur. These imperfections give marble its individual character.

Dims

Height: 71.5, 72 or 73 cm depending on the thickness of the tabletop.
