## LATITUDE

Quarter cut and rift cut veneers - the very best available, harvested sustainably, in a wide range of standard as well as custom species - are sourced and selected by hand, and chosen carefully for every office. Whether it is for one office or a hundred, every office suite is individually made, piece by piece, to create extraordinarily beautiful workspaces. Even the drawers are special in this product: made of wood, with dovetailed construction, and self-closing - they are in keeping with the exacting workmanship that goes into every Latitude piece.

## LATITUDE | OPTIONS

Worksurfaces are designed for efficiency and attractiveness: devices can be plugged in at the front edge of tops for easy access. Adjoining worksurfaces can be the same height as the primary worksurface, or at a lower level. Some worksurfaces have a pedestal that attractively and usefully extends out from the end of the top, increasing space and legroom under the worksurface. Cabling is channeled with an accessible trough system through the product to wall and floor connections.
