24 - May - 2007

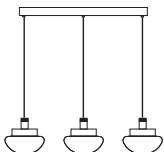

STRUCTURE S3

STRUCTURE L2

STRUCTURE L3

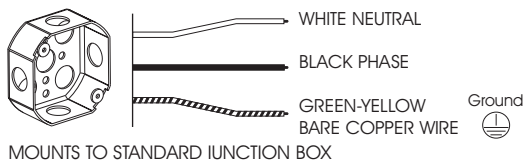

**WARNING: BEFORE STARTING INSTALLATION MAKE SURE THE POWER IS OFF**

1. Remove cover "B" from structure "A". Take care to not disconnect the grounding wires provided "X".
2. **Structure L2 and L3:** Install structure "A" on the j-box by the backplate "P" previously filled. Place the two half cover plates "Q" and secure them by the two screws. Also use the "V" side slots provided.  
**Structure S3:** Install backplate "P" to the j-box, then place the cover "Q" and Structure "A" matching the medium hole "T" with the threaded tube of plate "P". Lock the structure on plate "P" by the nut "Z". Also use the "V" side slots provided.
3. Guide each lamp cord through the corresponding threaded ring "C", then guide each lamp cord through the corresponding plastic clamps "E" provided and lock each one at the desired length by tightening securely the corresponding screws.
4. Connect wires to the terminal connector device "M". Take care to match the correct polarity on the corresponding wiring diagram as shown in **ILL. 2** of each model. **NOTE:** we suggest to cut the excess wire.  
**WARNING:** Make sure that the provided grounding "X" wires between cover "B" and structure "A" are still securely connected.
5. Replace cover "B", as shown, and secure it by screwing securely the above mentioned rings "C" on the corresponding plastic clamps "E".
6. For the correct installation of the lamp body and glass diffuser please follow the instructions provided from point 5 of the corresponding instruction sheet.
