

Five Workbays Retreat M create a row of individual retreat zones.

Innovative polyester fleece

Workbays consist of slim-line aluminium profiles and organically formed wall elements made of sound-proof, pressed polyester fleece. The material is light and robust and has a pleasant feel. Workbays are available in eight different colours. These colours in turn convey different moods ranging from calm through to stimulating.

Workbays

Up until recently, individual work was performed at one's desk and meetings were held in conference rooms. Today, offices are places of constant communication. People retreat to alternative environments to perform silent, concentrated work and to hold meetings. In order to productively structure this new way of working, various different work situations need to be interlinked.

With Workbays, Ronan and Erwan Bouroullec have developed an organisational cycle that redefines the working environment and breaks with the typical rigid planning structure of offices. But Workbays are more than just multifunctional furniture systems. They are systems that offer employees the freedom to select the work environment that suits their respective current tasks.

A variety of applications

Workbays feature sound damping elements and thus help to absorb any distracting noise in the areas surrounding the individual rooms. They can spontaneously be used as telephone booths, as video conference rooms, as reading corners, as coffee corners or as meeting rooms – without having to banish participants to a closed room.

Configurations according to individual requirements

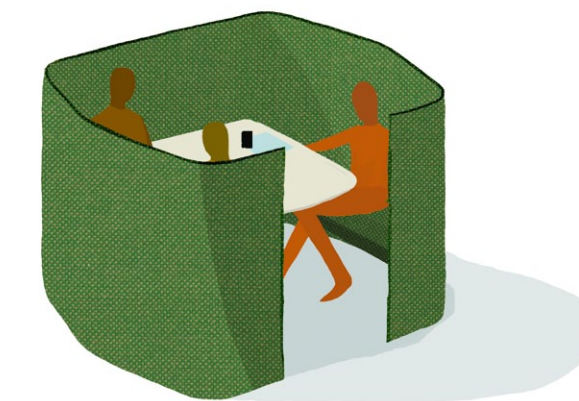

Workbays are suitable for a wide range of different rooms. The system can be extended and adjusted as necessary and thus grows organically. The concept is based on wall elements in two different heights.

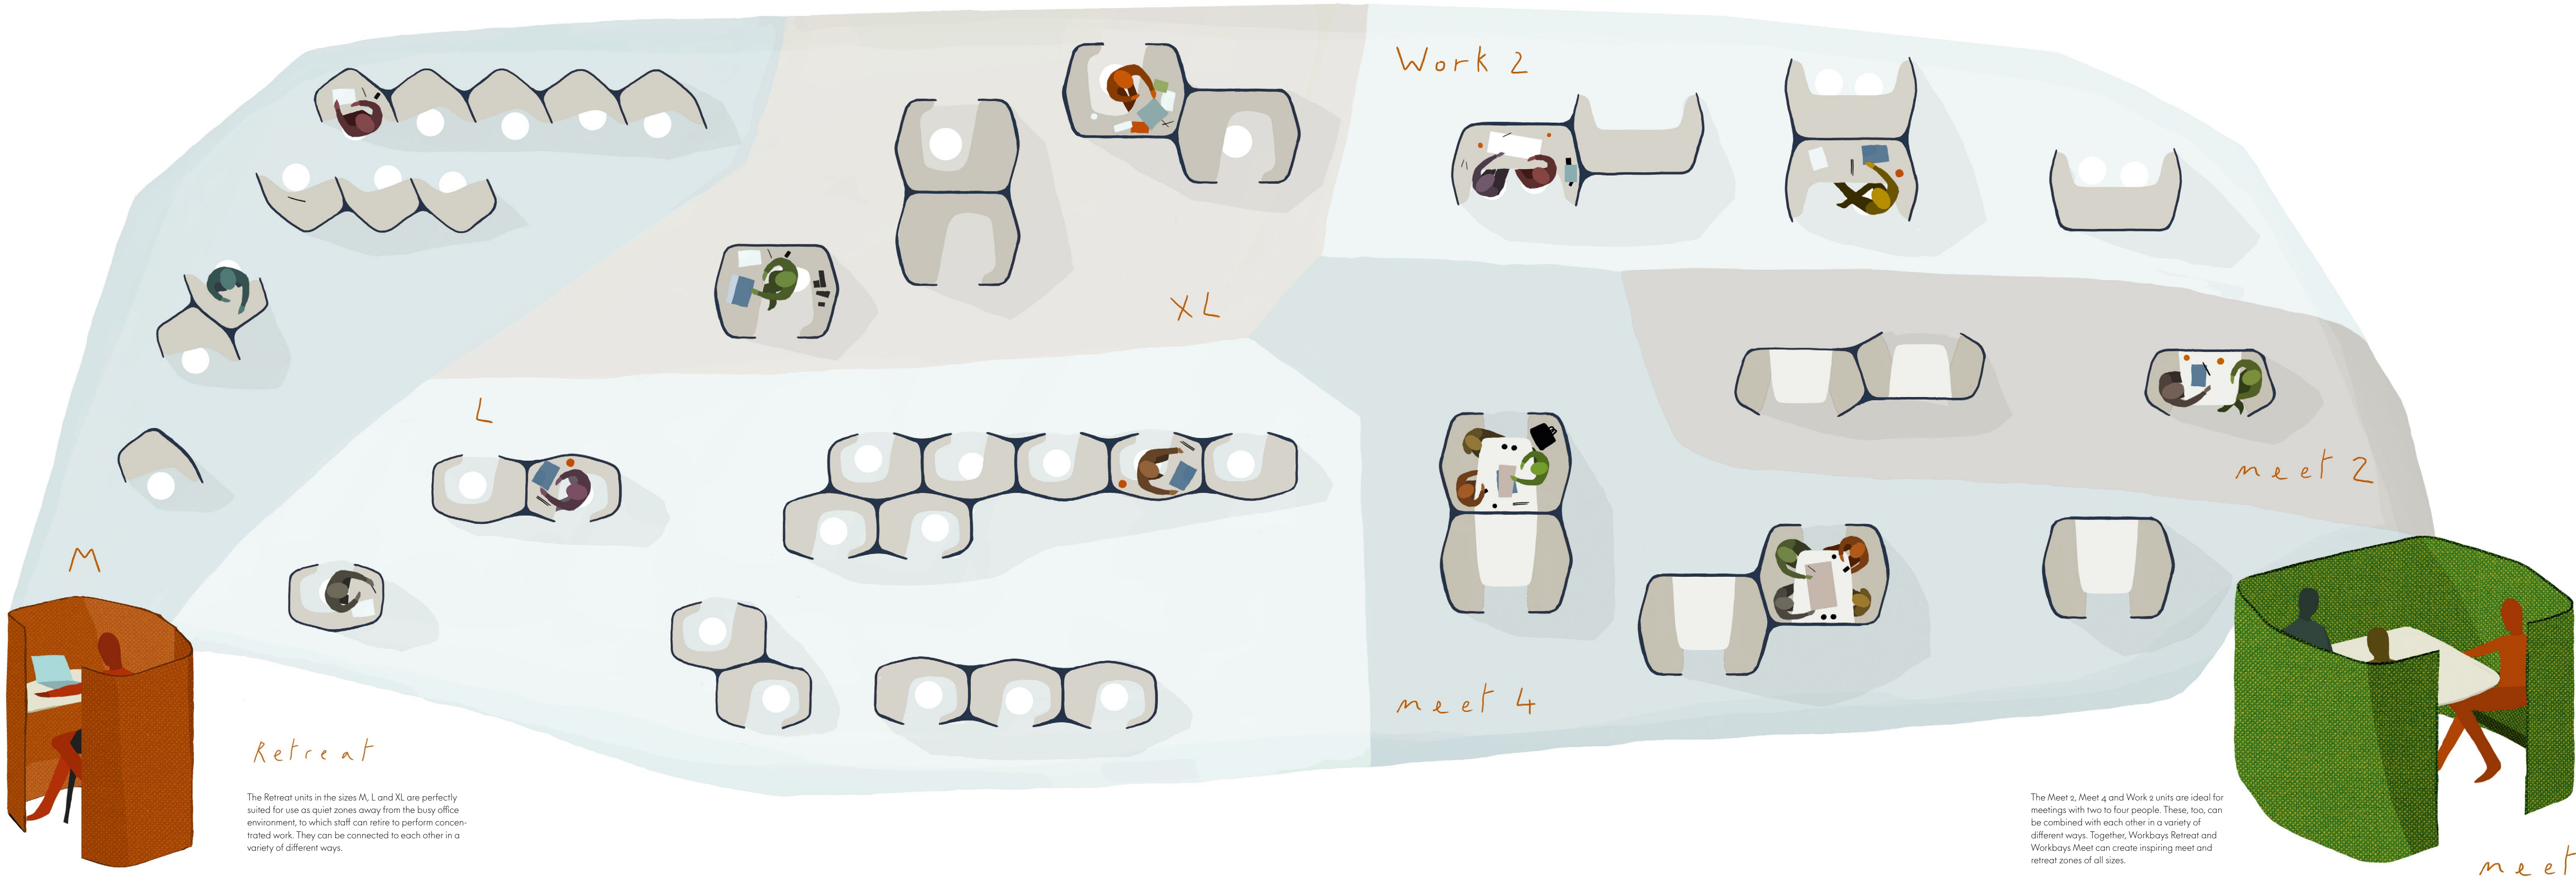

Two Workbays Retreat M, staggered.

Two Workbays Retreat L, in a row.

Workbays Meet 4 for meetings with up to four people.

Retreat

The Retreat units in the sizes M, L and XL are perfectly suited for use as quiet zones away from the busy office environment, to which staff can retire to perform concentrated work. They can be connected to each other in a variety of different ways.

The Meet 2, Meet 4 and Work 2 units are ideal for meetings with two to four people. These, too, can be combined with each other in a variety of different ways. Together, Workbays Retreat and Workbays Meet can create inspiring meet and retreat zones of all sizes.
