

NEVERS®

THE COMPLETE MEETING ROOM™

seminario™

collection

“seminario™ is a complete furniture collection specifically designed for seminar, training, meeting and multi-purpose rooms...with contemporary styling and state-of-the-art functionality.”

- Daniel Figueroa, designer

seminar

training

From seminar to meeting room, seminario™ pieces mix and match to accommodate and inspire.

The planning meeting runs late and the client is already here. Tables slide from the room. Chairs are quickly stacked. Easels are opened and rooms are transformed. With only a moment's time and the slightest effort the training center becomes an intimate conference room for your most important presentation. The *seminario™* Collection offers mobile tables, personal tables, mobile storage & display units and companion seating. Simple, sleek lines and contemporary finishes make *seminario™* ideal for the simplest to most grandeur of office settings. Most pieces can be easily stacked and transported to storage spaces, ready to come out as needed.

Contemporary, sleek lines with good old-fashioned strength.

Don't compromise appearance for strength. Or vice versa. *seminario™* is the perfect blend of design and function. Powder coated legs, fine wood and veneer work surfaces, and aluminum frames are only some of the features that make this line of furniture as functional as it is attractive. And each piece is engineered with ease of handling in mind. One person can easily move each unit; optional casters make mobility even easier. Use tables alone or configure with others in rows, training circles, conference spaces or more. Use tables solo, or pair up with others, using optional modesty panels for working privacy and for effectively handling wired configurations. However you use whatever pieces, it's a good thing no detail was missed because once you purchase *seminario™*, you'll find that it'll be sticking around for a long, long time.

tables

constructive configurations.

Place back-to-back for roundtable discussions. Line up to form rows. Or create horseshoes for intimate lectures. There are as many ways to configure *seminario™* tables as there are reasons to do so. Six different table shapes can be used together or free-standing. When used together, tables can share legs. Sturdy, metal channel runs full length and width of all tables, providing endless leg placement options. Legs are easily made mobile with optional casters. Patented, quick-release function makes for easy tear-down as table trolley makes for quick and easy mobility and storage. Durable tabletops are available in wood, laminate or linoleum, each with our distinctive, exposed-edge veneer. Optional Modesty Panels easily attach for working privacy, as do electrical/data ports and wire/cable management troughs for accommodating technology.

modesty panel -
assists in concealing wiring without compromising detail and keeps cords in place and organized.

within modesty panel -
hinges out for ease of access to the concealed outlet.

cable access leg -
channeling leg allows for simple routing of electrical wires and cables

veneer top -
with multiplex edge

linoleum top -
with multiplex edge

laminate top -
with multiplex edge

portable power port -
allows for easy mobility,
attaching to the edge of
the table supporting both
electrical and voice/data
capabilities

interact box - angled for
easy access, the interact
box supports both
electrical and voice/data
with optional daisy
chaining capabilities.

exclusive quick-release system -
The exclusive quick-release system effortlessly links tables together forming configurations to support your daily life. Legs are attached anywhere along metal channels allowing for individual leg placement.

mobile units

Furniture that fits your pace.

Mobile Easels turn into a flip chart, presentation board, or both and have four casters, two of which lock. Units accept flipchart paper, marker boards or fabric tack board for simple displays. Also great for room dividing.

Our Mobile Equipment/Service units include an information cart, media cart, projector cart and catering cart. Each is sturdy, yet lightweight making wheeling it from room to room a cinch. Media and projector carts both include power strip built into the floorboard, making it ideal for overhead projectors, computer presentations, and more.

Our Mobile Lectern Unit includes handgrip and slightly inclined top for comfortable presentations. Casters make moving unit in and out of meetings a breeze. Side screens make for easy gripping.

Whether you need to fill a large training hall with personal tables, or only pull out a few during temporary situations, count on our mobile units for ultra-changeability in office spaces. The simple, lightweight yet durable design of the personal table makes it a perfect fit for any space. Veneered multiplex beechwood work surface provides plenty of room for working, and includes raised ridges for writing utensils. Units easily stack for great storage solutions.

mobile storage units -
Accommodating a variety of meeting room equipment and supplies, units are effortlessly transferred from room to room. Mobile Storage Units are available in a variety of different and unique pieces.

meeting

seating

Let your seat decide!

Never underestimate the power of a good chair. Ergonomic and comfortable to sit on, these lightweight chairs are also easy to move, stack and store. Durable construction includes steel tube frame, available in powder coated silver or black.

Choose from Leg Chairs or Sled Base Chairs, each available with or without arms. Choose from natural beechwood or maple veneer or upholstered seats and backs. Backs are also available in durable poly. Use Chair Transport Cart to take the sweat from getting stacks of chairs to and from rooms, or up and down floors.
