

Greek Revival Chest

This chest emanates the cultural influence of Grecian architecture. The stately pillared facade leads into the contrasted relief of warm glowing Butternut Crotch creating the illusion of a prominent portico. The classical arch and columns are cast in meticulously matched Aspen Stump which enhances the highly formalized characteristics. To accentuate the design, a wide band of trim at the cornice line and plinth is done in a narrow, vertical band of Macassar Ebony. Reclaimed Elephant Ivory escutcheons and hand-cut dovetail drawers instantly elevate this piece into a family heirloom for future generations. The Greek Revival Chest is a sculptural piece that emphasizes elegance of proportions and effects of light on the surface.

Available in all woods and finishes.
