

CUSTOM FABRICATION

PROJECT # 20783 (002-02)

DESCRIPTION AS SHOWN

Project #	20783
Style Code	002-02
Dimensions	24"W at top, 42"W at bottom x 24"H
Materials	Metal side diffuser, acrylic bottom diffuser
Description	Fire Farm was commissioned to develop a clean and contemporary lighting solution for a high-end design center that would not compete with the products being sold below, yet add a level of sophistication to the interior space. We combined traditional lampshade construction techniques with a colored acrylic bottom diffuser and tapered the shade to open to the ceiling space above, contributing to the expansive sense of space above.

COMPANY INFORMATION

Fire Farm manufactures unique accent lighting for residential and commercial applications in our United States factories since 1991. We welcome custom fabrication projects in addition to our product line of diverse Table, Floor, Pendant, Chandelier, Sconce and Flush-mount lamps.
