FOSCARINI

A happy marriage of technology and decoration, See You is a wall or ceiling lamp which can be used in all settings requiring a highly functional light, without relinquishing a strong styling presence. See You consists of two large lenses, with each of the four faces developed in a different way. The first lens works on managing the luminous flux, while the second is marked on the outside by typically artisanal working and by apparently casual decorations on the inside, which focus the luminous flux, guaranteeing a surprising level of visual comfort.

It offers a direct light as well as light reflected on the wall owing to the transparent edge, which can be customised with the insertion of colored filters, supplied in red, orange and blue.

Description

Wall/ceiling lamp with reflected and diffused light for indoor or outdoor use (IP55). Diffuser consisting of two injection moulded polycarbonate lenses; the first lens has a polyprismatic internal surface and an external spiral patterned surface, while the exterior of the second lens, on the exposed side, features an artisanal frieze and decorations on the inside, in an apparently casual manner, similar to drops of water. The decorations play an optical role, concentrating the luminous flux. Body and wall mounting plate in transparent injection moulded polycarbonate, electronic ballast. Set of three polyester filters supplied (0.2 mm) in red, orange and blue, to be positioned along the edge of the mount.

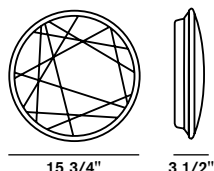

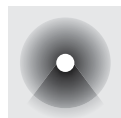

Materials: polycarbonate

Colours: transparent

Brightness

diffused and reflected light

Weight

net lbs 8,39
gross lbs 12,80

Packing

vol.cub.ft. 2,893
n.bboxes: 2

Bulbs

– fluorescent 1x40W + 1x22W 2GX13
type circline T5 electronic ballast

set colored filters included

Certifications

suitable for wet locations
