

Meet. Collaborate. Connect.
 Collective Motion conveys a purely modern aesthetic enhancing lounge and teaming environments. Technology and media solutions are addressed

through media consoles with concealed storage and a lounge height meeting table with central power/data. A sliding top expands the surface for seated users.

Flexibility is realized through an assortment of accessories designed to complement large or small gatherings. Ottomans, tables, and marker boards are easily rearranged into an array of configurations.

Adaptable to open or private areas, the lounge seating is available in multiple widths, huddle style, and with privacy panels or casters, offering endless application possibilities suitable for corporate, institutional, hospitality and retail environments.

Sophisticated to progressive,
the mobile armed, armless
and asymmetric lounge forms
are accentuated by a refined
mix of materials, bolster-style
armrests and tailored cushions.

Dual finish and fabric options
paired with a broad selection
of ecoresin privacy screen col-
ors provide even more cre-
ative possibilities.

Part of a comprehensive family,
Collective Motion is designed
to be configured with offerings
from Collective Presentation for
casual style meetings,
Collective Space for open plan
teaming or Collective Office for
private settings.

Two distinct styles marry into one inimitable personality. Huddle tables and privacy screens encourage collaboration and teamwork. Lounge elements such as the precisely designed occasional tables add prestige to waiting areas. Mix and match for diversity and functionality in any setting.

Think of it as architecture on the move. The coveted mobile mini stool is lighthearted and fun, perfect for small meeting arrangements or as a stowable guest option.

Mobility of modular elements is reinforced by pairing slider glides with casters. Practical features such as the pivoting tablet and multi-use shelf enhance the functional design.
