Comfortable under all conditions, Convex Flex can be specified as a task, conference or executive chair. Arms can be upholstered, molded or rotating. Six different mesh colors are available.

Ergonomic detailing feels as good as it looks. Both the mid-back and high-back styles adjust for height, allowing Convex Flex users to optimize support at the critical lumbar region.

Synchronized adjustment mechanisms allow users to position the chair and lock it into place without standing up. Engineered to minimize tilting, Convex Flex has a wide tension range for all body types.

Artful seating gets down to business. Convex Flex combines breathable elastomeric mesh fabric, contoured padding and polished aluminum with a sleek arm option and a stylish base.
