

RISE

System Advantages

Electrically Operated

Provides effortless adjustment, without ever having to calibrate table or re-calibrate as loads change.

Electric Motors

Holds worksurface at set height until adjusted, unlike pneumatic legs that allow 'creep'.

Height Range

22" - 48" range meets the latest ANSI/BIFMA standards for sit-to-stand height adjustable tables.

Accommodates the 5% female seated to the 95% male standing. Allows one standard table to fit all staff without the need for a keyboard arm & platform.

Power Consumption

At only 0.05W in standby, the lowest rating in the industry, an ISE RISE Electric table consumes less than 0.5 kWh per year at a cost of less than 5 cents per year.

Crossbar Free Design

Horizontal stabilizers and worksurface support are located under the table top. Unique support design maximizes the knee clearance envelope.

Anti-Collision

Motors automatically cut off when the table top hits an immovable object on the way up or down preventing accidental damage.

Custom Colors and Compatibility

Bases are available in silver and black as standard, and also any other color to match the RISE base to any other manufacturer's systems furniture.

Scratch-Free Columns

The three sleeve columns are manufactured so that there is no metal to metal contact, eliminating scratching of the paint finish ensuring the same quality finish for a guaranteed 10,000 uses.

Environment

All ISE RISE bases are free of BPA, PVC, halogen and chemical lubricants ensuring a safe, toxic free environment.

LEED

MR 4.2, ID 1.1-1.4 eligible.
