

ARAY

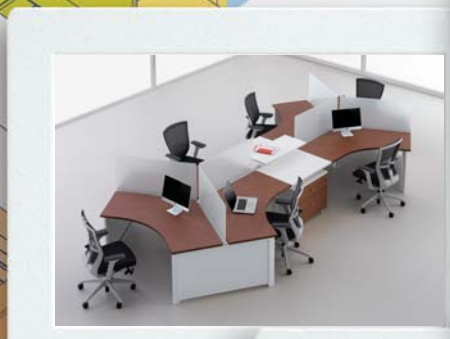

One for All

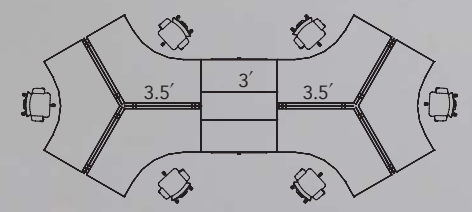

Building on MAI's award winning designs, the ARAY furniture system combines three systems into one, providing a clean, versatile and consistent aesthetic for all levels and functions throughout the office.

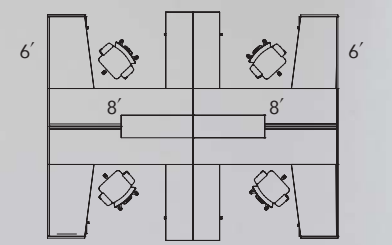

ARAY - Beam Based system represents the industry's first crossover design, combining the simplicity of desking and systems furniture. Desktop glass screens in various colors elegantly divide space without affecting communication or light transfer. Floor privacy panels in a variety of finishes provide additional privacy and define boundaries in large open spaces.

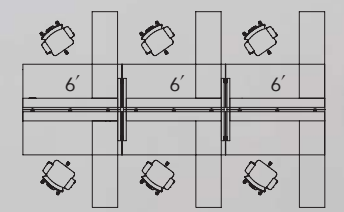

ARAY - Panel Based system is based on MAI's award winning 3-1/2" steel frame and tile system. Stackable and de-stackable frames can be raised or lowered to accommodate changing requirements for visual and acoustical privacy. Off modular design allows flexibility in workspace size, configuration, and in locating workspaces, overhead bins, and divider panels.

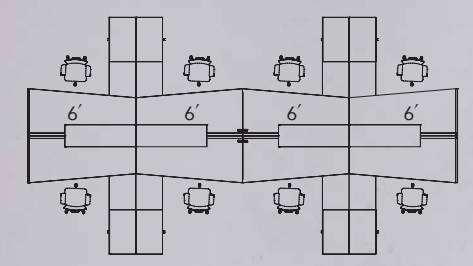

ARAY - Private Office represents the next evolution in private office furniture. Based on a modular component design concept, ARAY - Private Office furniture is more adaptable than conventional factory-built casegoods, allowing changes to be made easily and cost effectively. ARAY - Private Office is available in laminate or veneer and is designed to integrate perfectly with our award winning ALUR wall system.

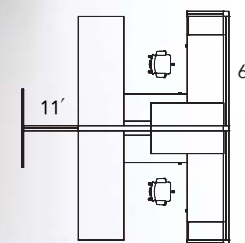

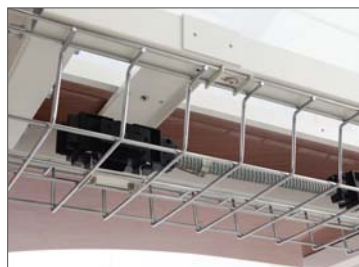

DESIGN FEATURES

Top Mounted Bin

Off Modular Connections

Advanced Cable Management
