

XSITE[®]

Kimball[®]Office

balance

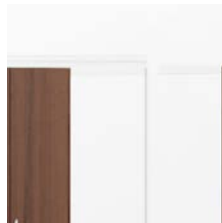

**Concentration and Collaboration in Balance**

Xsite® is a frame and tile system that lets you create a workspace where both independence and interaction are supported. Xsite components can easily be configured to fit your current workforce and office layout, and just as easily reconfigured to accommodate future changes.

Xsite gives you design options. Put tiles anywhere. Create space in more shapes. Customize storage systems. Place components wherever they're most useful. Xsite removes boundaries.

Traditional and Modern Style choices are extremely broad and flexible. Xsite top caps and trim are available in two profiles, with a wide range of paints and wood finishes. Tiles can always be placed independent of the frame, and can be different on either side of the wall. Metal, painted, laminate and fabric tiles in bold or muted colors can define your office's look and feel while also supporting your organization's culture, personality, and brand. From the reception station to the executive suite, wood tiles and trim can make a warm, welcoming statement. Tackable acoustic, slat, and storage tiles are both functional and attractive.

Power and Light Xsite is engineered so you can distribute power and data easily, virtually anywhere within the frame. An ample base wireway harness, midlevel distribution, and technology tiles with integrated outlets make connections simple.

Fit and finish
With simple top cap and corner components you'll have fewer pieces, which means fewer seams, better fit and less installation time.

Technology support
Functionality and aesthetics, deliver plug-and-play power & data in several color and finish options.

A clear statement
Frameless glass used with flat top caps clearly defines space in collaborative areas.

deliver

XSITE[®]

Plenty of options
Storage for under and over worksurfaces plus high-back organizers, towers, bookcases, and wardrobes.

Set your office free
The Traxx mounting system is integral to the frame, so you can place tiles, work tools, worksurfaces, and storage anywhere.

Seen but not heard
Glass tiles allow light to spread from windows to interior spaces and provide enclosure.

Design Freely Utilizing our integrated design strategy, our Footprint[®] series delivers a unified portfolio of worksurfaces, support elements, storage units, and mobile pieces for creating workspaces with more possibility and personality. They work together with Xsite to expand design and function.

An extensive and coordinated offering of details, materials, and finishes ensures aesthetic cohesiveness. Footprint's combined design offers a wide range of application opportunities—freestanding enclosed offices, open plan environments, and collaborative team spaces can be fashioned using standard components. With its inherent versatility, Footprint combined with Xsite allows you to move fluidly across a broad spectrum of workspace solutions.

An Environmentally Responsible Choice

Xsite demonstrates Kimball Office's commitment to the environment. It meets and exceeds the most stringent indoor air emissions standards. It has been evaluated against level[®], BIFMA's sustainability certification program for furniture, and is level 2 certified.

Inherent in any sustainability criteria are durability and adaptability. A system for both today and the future, Xsite is built to last.

XSITE®

- 1 Frame: welded, fixed
- 2 Top-channel lay-in: routes data cables
- 3 Mid-frame support: spans frame and provides support
- 4 Tile to tile horizontal jumper
- 5 Duplex receptacle
- 6 Data plate that holds two ports
- 7 Base to tile power jumper
- 8 Base wireway jumper: connects power between adjacent base wireway harnesses
- 9 Base wireway harness: distributes power through frame base
- 10 Glass tile with wood frame
- 11 3-way, 90-degree connector
- 12 Xsite Traxx®: supports tiles, worksurfaces, and storage
- 13 Wood tile
- 14 Marker board tiles
- 15 Footprint® Panel Mount Overhead with sliding door
- 16 Technology tile: provides power and data access
- 17 Off-module connection: add frames without adding dimension
- 18 Perks® accessories
- 19 Tackable acoustic tile
- 20 Support leg
- 21 Slat tile
- 22 Panel-to-panel hi-lo trim: a clean finish where panels change height
- 23 End trim
- 24 Sliding Privacy Door
- 25 To-The-Floor Frame
- 26 Open Base Frame
- 27 Frameless Glass Rail

Xsite frames are available in five different base heights and can be built up to 80" and 93" tall by adding one or two stackers. Frames can be extended in three-inch increments. So, offices can be sized as needed.

Simply Put...

Xsite is a system that eliminates limitations and allows design to emerge freely. Now ideas don't have to be confined to a cube.

At Kimball Office, we pride ourselves not only on fine craftsmanship and high-quality products, but also on quick delivery and seamless installation. We work with a network of dealers who will make sure the furniture you select looks just as good in your office as it does in the showroom.

Let us know what we can do for you.
