

Introducing the chair that's so much **more** than a chair.

Fit is a chair unlike any you've ever seen before. In fact, at first glance Fit doesn't look like a chair at all. Where is the seat? A chair is supposed to have a seat. That's what makes it a chair, right?

Fit is unique in that it only becomes an actual seat when you sit in it. But when you do sit down, it's one of the most comfortable seats you will ever experience. Fit's surface is made of three-dimensional Trevira open mesh fabric, woven into four separate zones for ergonomic support. These

zones support your weight by adjusting along three planes to create the ideal individual position for your body. Whether sitting straight, lounging, curled up or rolled to the side, Fit comfortably supports your body with no pressure points.

And when you're done, Fit springs back to its original shape, every time.

Fit KFI01 lounges and KFI02 headrests: green

Fit can best be described as an unorthodox approach to **comfort.**

Always a perfect **fit.**

Intelligent Mesh

There's no wrong way to sit in Fit. Its supporting mesh zones adjust to the weight of any user. The high flexibility netting near the top cradles the neck, shoulders and upper back; more supportive netting through the center of the seat creates a natural lumbar support; the most supportive mesh is reserved for the lower section, creating a cradled seat comfortable for all types of body and sitting styles.

Astonishing Design

The knitted Trevira fabric of the Fit chair is stretched across 1-3/16" of tubular steel painted to match the mesh. The open, cantilever design produces an atypical aesthetic while allowing the user to enjoy a comfortable seat free of pressure points caused by hard support surfaces. A removable headrest can easily be added or removed as needed.

Fast Storage

The unique 60-degree angled design of the Fit chair allows for quick nesting and storage. Because there is no formed seat when the chair is empty, the chairs slide together or apart without lifting. Fit chairs can easily store upright or on their side.

Fit KFI01 lounge: grey; shown with Silver™ small lounge table; Bingo® stools; Scenario™ table.

First comes surprise. Then, **delight.**

“When does a seat become a seat? When you sit in it. Fit is a new philosophy in sitting. The carefully engineered zones adapt to and support your every position for a uniquely comfortable and liberating experience. Everyone has to sit in Fit at least twice: the first time to be surprised, the second time to be convinced and enjoy.”

—CHRISTINE LÜDEKE, PRODUCT DESIGNER

Sustainability:  

In our manufacturing processes, material choices and product designs, Kimball Office shows a strident commitment to sustainable goals. To that end, Fit may contribute to LEED® credits. Please refer to our Environmental Data Sheets, located on www.kimballoffice.com, for specific details. Fit meets all of the IAQ testing requirements for Indoor Advantage Gold Certification from SCS (Scientific Certification Systems).
