

CERTIFICATIONS AND APPROVALS

Over the years Nevamar has expended considerable effort to comply with building regulations and fire safety requirements. This has resulted in Nevamar being accepted by government agencies and services for a variety of critical uses.

The following list is not all inclusive:

Inquiries should be directed to the Quality Assurance Department at
NEVAMAR DECORATIVE SURFACES
One Nevamar Place
Hampton, South Carolina 29924
Phone: (803) 943-7200 or (800) 638-4380.

ANSI (American National Standard Institute) / **NEMA** (National Electrical Manufacturers Association) Publication LD3, latest edition - Standard of the High Pressure Decorative Laminate Industry, used to maintain the quality of product.

Underwriters Laboratory Inc. - A recognized independent testing service for product classification. U.L. does not certify or approve any products. They do, however, rate products and list them. It is up to the individual code authority to set standards for a particular application. Unbonded condition is not usually reported. Since Decorative Laminate is not used unbonded, Underwriter's Laboratory only numbers those for the unbonded condition. See Underwriters Laboratory website at WWW.UL.com under the certifications tab for more information.

U.S. Government Specifications:

Federal Specification LP-508H (April 19, 1977)

- Type I - General Purpose Grade
- Type II - Postforming Grade
- Type III - Hardboard Core Grade (No longer mfg. by Nevamar)
- Type IV - Non-Decorative Backing Grade
- Style, class and finish designated

U.S. Navy-MIL-P-17171E (SH), May 25, 1990

- Type I - Horizontal General Purpose Grade
- Type IV - Horizontal Fire-Rated Grade
- Note: Type IV will refer to MIL-SD-1623 requiring a U.L. label in each sheet of laminate.
