

M60 Series

Extruded Linear Rectangular Fluorescent

Compact Design Flexibility

M60 extruded fluorescent lighting from SELUX opens up a whole new vista of interior lighting possibilities. Measuring out at less than 2.5" wide, M60 can be custom configured to neatly coordinate any office, corridor or retail space. Mounting options include recessed and surface direct lighting, as well as pendant and wall mount in direct, direct/indirect and indirect variations. Lamping is one T5 or T5HO for direct and indirect, and two lamps for the D/I versions. This is the ideal extruded form, allowing for endcaps flush to walls or other structural forms, angular connections at any location, and clean and simple installations.

M60 Advantage

Compact architectural scale for recessed, surface and suspended applications

Developed with a dedicated systems approach for total design freedom and specification flexibility

Choice of Silky Specular Parabolic aluminum louver or Satine Lens high quality acrylic shielding

Precision reflector systems for optimized output of T5 and T5HO fluorescent sources

Available in direct, indirect and direct/indirect configurations

The system allows a combination of fluorescent and spot sources to be incorporated in one section.

Integrated MR11 Downlights

Die cast end plates

Many recessed mounting options including splackle flange for architectural wall and ceiling applications.

Linear extruded aluminum advantage allows for a clean ceiling appearance, continuous row mounting, mitered corners and custom cut lengths enabling wall-to-wall mounting.

Quick release gear trays, snap-in shielding and optional mounting hardware simplifies installation and maintenance.

M60 Solutions

A COMMITMENT TO SERVICE

SELUX is committed to the highest standard of customer service. Our engineers will preview and check preliminary layouts and design parameters and suggest various configurations supported by detailed mechanical and photometric specifications. And we will work closely with you to modify standard products or create custom fixtures for special applications.

LIGHT

Artificial light is perhaps the most fundamental requirement of modern civilization. For over fifty years, se'lux has been a leader in the development of advanced lighting products that have helped transform light from a mundane necessity into a vital, vibrant architectural and design element.

IDEAS

As a multinational company SELUX calls upon the talents of engineers and designers in both the U.S. and Europe to deliver the most innovative concepts in lighting design. And in our New York facility, we back up this global perspective with the strength of American technology and manufacturing capability.

SYSTEMS

At se'lux we believe in a systems approach. Each design features a variety of mounting configurations and shielding options. This system-oriented flexibility allows for a tremendous variety of visual and photometric effects.
