

Commercial Ceilings & Walls Product Guide 2015 | 2016

HunterDouglasContract

CEILINGS

WHO WE ARE

Throughout the world, Hunter Douglas works continuously with architects and designers to bring original ideas off the drawing board and into reality.

Ceiling and wall systems from Hunter Douglas offer a range of material options, including metal, wood, and Techstyle® acoustical panels.

Our ceilings and walls provide a variety of benefits to both interior and exterior spaces:

- Design flexibility
- High value and high performance
- Durability
- Environmental responsibility

HUNTER DOUGLAS, A WORLD OF INNOVATION

Hunter Douglas is a world-leading manufacturer of architectural products, including innovative window-coverings, sun-control solutions, ceilings and walls, and façade systems. Key products include:

- Roller shades and screen fabrics
- Venetian blinds
- A wide range of FR window shading systems
- Automated and specialty shading systems
- Suspended ceilings
- Wall panels
- NBK® Terracotta Façades
- Quadroclad Metal Façades

For information on all Hunter Douglas products, please visit www.HunterDouglasContract.com.

OUR FOUNDING

Hunter Douglas was built on recycled aluminum. In 1940, company founder Henry Sonnenberg moved to America from Holland and founded the Douglas Machinery Corporation. A few years later, he began a critical collaboration with inventor Joe Hunter, who had invented a casting machine that could convert scrap aluminum into ultra-hard alloys.

CEILING DEVELOPMENT

Based on this unique casting machine and developments of roll-forming and stamping equipment, Henry and Joe pioneered the development of the aluminum venetian blind, and jointly created Hunter Douglas as we know it today. In 1962, Hunter Douglas introduced linear metal ceilings, creating a standard system that today has evolved into a complete range of products for projects of all types.

WORLDWIDE PRESENCE

Today, a significant part of Hunter Douglas' business remains dedicated to recycled aluminum, with a recycling facility, smelter, and continuous caster in Rotterdam, Holland. From that base, the company operates fabrication and distribution facilities in over 100 countries, with installations in thousands of projects around the world.

SUSTAINABILITY

Hunter Douglas stands at the forefront of developing sustainable product concepts. We seek to simplify assembly, improve production processes, eliminate waste and reduce maintenance within our own operations, while also partnering with organizations such as the USGBC and GBI to make an impact on all phases of the building industry.

TORSION SPRING

Torsion Spring metal ceiling system allows both flat and curved ceiling panels to swing down from the ceiling plane.

KEY FEATURES

- Two panel size sets:
 - 6" to 36" width up to 120" long
 - 48" width up to 48" long
- Swing-down feature allows point-access and 100% access to plenum
- Square-edge design
- Waste reduction with factory fabricated dimensional material
- Downweight: reduce dead load with lightweight aluminum
- Interior and exterior applications
- Compatible with industry standard lighting, HVAC, speaker, fire safety, and security services

COLORS & FINISHES

Standard colors Natural and Cotton White shown. Client-specific colors available. Minimum quantities may apply. Colors are for illustrative purposes. See page 178 for all colors and finishes.

TYPICAL ISOMETRICS

PERFORATION PATTERNS

Standard patterns shown. See page 186 to see all perforation patterns. Scale shown: 1:1, unless otherwise noted.

PHYSICAL DATA

- Substrate:** Aluminum
- Warranty:** 1 year
- Seismic rating:** Zones A,B,C,D,E,F
- Fire rating:** Class A Fire Rated per ASTM E84
 - Painted or anodized metal: Flame spread: ≤ 25, Smoke ≤ 50
 - Film on metal: Flame spread: ≤ 25, Smoke ≤ 50
 - Wood veneer on metal: Flame spread: ≤ 25, Smoke ≤ 55 (for interior applications)
- Weight:** Varies 1.0 – 1.5 lbs./sq.ft.
- Wind load:** Per code (for exterior applications)
- Recycled content:** Up to 85%
- Light reflectance (LR) Coefficient per ASTM E1264 & ASTM E1477:**
 - Cotton White: LR = 0.81
- Acoustical ratings – NRC:** See page 190

LAY-IN LEVELS

Lay-in Levels metal ceilings are offered in a variety of panel sizes with a range of panel depths and finishes that create topography along the ceiling plane.

Photo: Lay-in Levels Concept

KEY FEATURES

- Four panel size options:
 - 12" wide up to 72" long
 - 20" wide up to 60" long
 - 24" wide up to 72" long
 - 30" wide up to 60" long
- Square-edge design
- Various panel depths from 4" above grid face to 4" below grid face
- Waste reduction with factory fabricated dimensional material
- Downweight: reduce dead load with lightweight aluminum
- Easy plenum access
- Compatible with industry standard lighting, HVAC, speaker, fire safety, and security services

METAL CEILINGS

LINEAR PLANK
300C

300C metal ceiling panels offer a subtle, long span design for interior ceilings. This panel features a built-joint, "bevel edge" that moderates panel-to-panel connections for an orderly, finished design.

© Jeffrey Johnson

Project: Smoothie King Center, New Orleans, LA; 300C

KEY FEATURES

- Panel width: 12" nom. [300 mm]
- Panel length: 3' to 19'-8"
- Bevel-edge design
- Waste reduction with factory fabricated dimensional material
- Downweight: reduce dead load with lightweight aluminum
- Easy plenum access
- Interior and exterior applications
- Compatible with industry standard lighting, HVAC, speaker, fire safety, and security services

TAVOLA™ CANTED

Individual sloping beam members establish a sense of motion in interior ceilings, either following existing conditions or creating new effects.

Photo: Tavola™ Canted Concept

KEY FEATURES

- Create movement with individual sloping beam dimensions
- Three beam types, three beam depths: 2" – 6", 2" – 4", 4" – 6"
- Six perforation patterns for elevated acoustics
- Standard heavy-duty 15/16" T-grid suspension
- Waste reduction with factory fabricated dimensional material
- Downweight: reduce dead load with lightweight aluminum
- Compatible with industry standard lighting, HVAC, speaker, fire safety, and security services

V-BAFFLE FINS

The thin blades of V-Baffle Fins offer one-way plenum masking in 4", 6", or 8" depths at 4", 6", or 8" wide spacing.

Project: Soccer Stadium Arena, Amsterdam, Netherlands; V-Baffle Fins

TYPICAL ISOMETRICS

KEY FEATURES

- Baffle spacing: 4", 6" or 8" nominal (standard carrier)
- Additional baffle spacing of 4 3/4", 5 1/2", 6 1/4" or 7" nominal is available with special order carrier
- Supports a variety of patterns including basket weave, herringbone, and radial
- Carriers allow design configurations to be horizontal or sloping
- Sliding carriers can be used for repeated plenum access areas
- Waste reduction with factory fabricated dimensional material
- Downweight: reduce dead load with lightweight aluminum
- Easy plenum access
- Compatible with industry standard lighting, HVAC, speaker, fire safety, and security services

HOOK-ON

Hook-On Woodwright™ ceiling systems offers an adaptable and customizable ceiling solution.

KEY FEATURES

- Two panel size sets:
 - 6" to 24" width up to 120" long
 - 30" width up to 60" long
- Square-edge design
- Waste reduction with factory fabricated dimensional material
- Downweight: reduce dead load with lightweight aluminum
- Easy plenum access
- Interior and exterior applications
- Compatible with industry standard lighting, HVAC, speaker, fire safety, and security services

COLORS & FINISHES

Woodwright™ finishes include our painted wood-look finish and laminated wood-look films. See page 180 for all finishes.

Standard colors Natural and Cotton White shown. Client-specific colors available. Minimum quantities may apply. Colors are for illustrative purposes.

WOODWRIGHT™
CEILINGSBEAMS & BAFFLES
TAVOLA™ CANTED

Individual sloping beam members establish a sense of motion in interior ceilings, either following existing conditions or creating new effects.

Photo: Tavola™ Canted Concept

KEY FEATURES

- Create movement with individual sloping beam dimensions
- Three beam types, three beam depths: 2" – 6", 2" – 4", 4" – 6"
- Six perforation patterns for elevated acoustics
- Standard heavy-duty 1⁵/₁₆" T-grid suspension
- Waste reduction with factory fabricated dimensional material
- Downweight: reduce dead load with lightweight aluminum
- Compatible with industry standard lighting, HVAC, speaker, fire safety, and security services

COLORS & FINISHES

Woodwright™ finishes include our painted wood-look finishes. See page 180 for all finishes.

The Echelon™ system combines large-format acoustical ceiling panels with a precise, anodized narrow grid. Panels are available in white or in custom textures, prints and colors.

Photo: Hotel Lobby Concept

KEY FEATURES

- Frame and Panel system has a combined recycled content of 30%
- Grid lines cleanly frame panels, light fixtures and diffusers for perfect integration
- Downward accessibility through snap attachment
- High-performance (NRC=0.85) acoustical panels in sizes up to 4' x 6'
- Fine extruded grid lines; clear or black anodized or white painted finish.
- Panels; white, matched colors, wood and textured finishes
- Floating trims may be factory curved, concave or convex

COLORS & FINISHES

In addition to the selection of textures and patterns shown here, panels can be matched to solid colors from major paint manufacturers. See page 182 to see all colors, patterns, textures.

HPDs & EPDs – available upon request

Techstyle® Translucent panels create backlit ceilings that combine a luminous glow with acoustical performance. Panels transmit up to 3% of daylight or artificial lighting.

KEY FEATURES

- Proprietary formaldehyde-free fiberglass composite construction
- 3% translucent, large format panels
- Convenient swing-down access to the plenum
- Easily accommodates standard fixtures
- High acoustical performance: NRC of 0.85 and SAA of 0.89
- Class A Fire Rating, per ASTM E84
- GREENGUARD Gold Certified

COLORS & FINISHES

Available in Radiant White only.

Radiant White

48" x 54"	48" x 60"	48" x 66"	48" x 72"

ACOUSTICS

Techstyle®'s honeycomb design absorbs both high and low frequencies at an impressive level, providing superior acoustical performance, no matter the frequency. NRC 0.85 (ASTM C 423) SAA 0.89 (ASTM C 423).

PHYSICAL DATA

- Surface Finish:** Polyester Non Woven
- Light Reflectance:** 75% (White) ASTM E1477
- Surface Burning:** Class A (ASTM E84)
 - Flame Spread Index \leq 25
 - Smoke Index \leq 50
- Acoustical Ratings – NRC:** 0.85 (ASTM C 423)
- Acoustical Ratings – CAC:** 17 w/no backer, (ASTM E1414)
- Moisture Resistance:** Resistant to 95% humidity in 104° temperature
- Fungal Resistance:** Resistant (ASTM C1338)
- Weight:** 0.30 lbs. per sq. ft.
- Warranty:** 10 year limited
- ICC:** Approval (ESR-2123)

KEY FEATURES

- Available panel sizes include:
 - 24" up to 96" long
 - 30" up to 96" long
 - 48" x 48"
- Square-edge design with flush or reveal joints
- Waste reduction with factory fabricated dimensional material
- Downweight: reduce dead load with lightweight aluminum

COLORS & FINISHES

Standard colors Natural and Cotton White shown. Client-specific colors available. Minimum quantities may apply. See page 178 for all colors and finishes. Colors are for illustrative purposes.

Woodwright™ finishes include our painted wood-look finishes, real wood veneers and laminated wood-look films. See page 180 for all finishes.

TYPICAL ISOMETRICS

PERFORATION PATTERNS

Standard patterns shown. See page 186 to see all perforation patterns. Scale shown: 1:1, unless otherwise noted.

PHYSICAL DATA

- Substrate:** Aluminum
- Warranty:** 1 year
- Seismic rating:** Zones A,B,C,D,E,F
- Fire rating:** Class A Fire Rated per ASTM E84
 - Painted or anodized metal: Flame spread: ≤ 25, Smoke ≤ 50
 - Film on metal: Flame spread: ≤ 25, Smoke ≤ 50
 - Wood veneer on metal: Flame spread: ≤ 25, Smoke ≤ 55
- Weight:** Varies
- Wind load:** N/A
- Recycled content:** Up to 85%
- Light reflectance (LR)** Coefficient per ASTM E1264 & ASTM E1477:
 - Cotton White: LR = 0.81
- Acoustical ratings – NRC:** See page 190

The Natura™ Wall system clips durable panels onto a sturdy surface-mounted track to secure panels vertically and create smooth, distinctive wall applications.

Project: Maricopa County Courthouse, Maricopa, AZ; Natura™ Wall

KEY FEATURES

- Variety of panel sizes
- Variety of veneers, including FSC
- Clear top coats and stains available
- FR particleboard construction
- Compatible with industry standard lighting, HVAC, speaker, fire safety, and security services
- ASTM E-84 Class A Fire Rating
- GREENGUARD Gold Certified

Techstyle® wall panel systems provide excellent acoustical performance. Integration with our ceiling system allows designs to continue seamlessly from the ceiling plane to maximize acoustical performance.

Photo: Clayco Forum Studio Office, St. Louis, MO; Techstyle® Wall Panels

KEY FEATURES

- Proprietary formaldehyde-free fiberglass composite construction
- High acoustical performance: NRC of 0.70 up to 1.0 and SAA of 0.86
- Easy snap-on attachment for wall applications
- Class A Fire Rating, per ASTM E84
- GREENGUARD Gold Certified

COLORS & FINISHES

In addition to the selection of textures and patterns shown here, panels can be matched to solid colors from major paint manufacturers. See page 182 to see all colors, patterns, textures.

ACOUSTICS

- Techstyle® wall panels offer three levels of sound absorption. All performance levels use the same front panel, but different backer.
- NRC 0.70: The simplest version is directly mounted to the wall with a 0.5" air gap and no backer. Total build up: 1.5".
 - NRC 0.85: Directly mounted to the wall with a 1.5" total build up and the gap filled with a 0.5" formaldehyde-free fiberglass 4 pcf backer.
 - NRC 1.00: Directly mounted to the wall with a 2" total build up and the gap filled with 1" fiberglass backer.

BIM CAPABLE

Collaboration starts with Hunter Douglas Ceilings.

Hunter Douglas Ceilings offers a comprehensive REVIT file library for BIM contributions, with resources that support the entire project, from design development, to working drawings, to preconstruction and construction, all the way through to ongoing operations and maintenance.

Go to www.HunterDouglasCeilings.com to view REVIT files

IPD CAPABLE

Support IPD

We support Integrated Project Delivery (IPD). The American Institute of Architects (AIA) currently defines IPD as “a project delivery method that integrates people, systems, business structures and practices into a process that collaboratively harnesses the talents and insights of all participants to reduce waste and optimize efficiency through all phases of design, fabrication and construction.”

Files types

Light files allow architects to quickly illustrate and explore design intent, while heavy files allow contractors to perform thorough means-and-method reviews. Standard metal ceiling offerings in "assembled" and "kit of parts" formats are available via Hunter Douglas' website.

Resources for project, product, application

Per-project, product and application is available by working directly with Hunter Douglas' team of experienced project and product designers. We support a range of platforms, including AutoCAD, Revit, Rhino, 3Ds Max, Adobe Creative Cloud, and Solidworks.

RESOURCES

COLORS & FINISHES (METAL)

Hunter Douglas offers a wide choice of colors and finishes. Some colors and finishes carry a premium price over manufacturer's standard colors. Custom color matching is available upon request. Please contact Hunter Douglas at 800-366-4327 for minimum quantities and lead times on specific orders.

NOTE: Colors are for illustration purposes only. To request color/finish samples, contact our Sample Fulfillment Department at ceilings@hunterdouglas.com. Please indicate color and product when ordering.

ACOUSTICAL TEST RESULTS (METAL)

SOUND ABSORPTION (NRC) SUMMARY

Ceiling panels are available in a variety of perforation patterns for optimum acoustical performance. Sound absorption can be achieved by the addition of backing these panels with acoustical fabric or pad. Contact Hunter Douglas Ceilings at 800-366-4327 or visit hunterdouglasceilings.com for further details.

Tests conducted in accordance with ASTM C423 and E795, with mounting type "J". Test Reports available upon request.

TAVOLA™ BEAMS & BAFFLES

standard calculation method is provided.

Appendix A to ASTM C423 Sound Absorption Test

Non-standard calculation of equivalent NRC Rating and Absorption Coefficients from spaced absorbers.

At this time ASTM C423 does not provide a standard method for determining absorption coefficients of spaced object absorbers. Tests of a set of sound absorbing objects spaced apart from each other will yield higher absorption rates than a specimen joined together as a single patch (A-Mount or E-Mount). For this reason it is unfair to provide NRC or absorption coefficient ratings for specimens that consist of a spaced set of absorbers. Despite this, the architectural industry has expressed great demand for a simple "single number" rating for these treatments. Likewise, acoustical consultants desire equivalent absorption coefficient data for use in acoustical modeling programs. The following is an attempt to appease these demands until ASTM develops a standard method for calculation. An alternate non-

Apparent Sound Absorption Coefficient calculated from total test surface area covered.

The total sound absorption yielded by the specimen is divided by the total horizontal surface area of the test surface covered by the suspended baffles, including intermediate spaces. The baffle rigging covered 80.0 sf of horizontal test surface area. Apparent Noise Reduction Coefficient (NRC) rating and Sound Absorption Average (SAA) figures are calculated from this data based on the methods described in ASTM C423-09a. This may be the most accurate method for comparing baffle arrays to ceiling tile products. The apparent sound absorption coefficient data can be assigned to a single horizontal surface or plane in acoustical modeling software for approximation of baffle array performance (assuming baffle spacing is similar to that tested).

NATURA™

Results for all Natura™ ceiling and wall panels*.

Perforation Pattern	% Open Area	Acoustical Infill	NRC
#203	4%	Non-Woven Acoustic	0.40
#204	10%	Non-Woven Acoustic	0.60
#310	14.5%	Non-Woven Acoustic	0.55

*Tests conducted in accordance with ASTM C423 and ASTM E795, in a type E400 mounting.

ACOUSTICAL TEST RESULTS (TECHSTYLE®)

TECHSTYLE® E

Techstyle®'s honeycomb design absorbs both high and low frequencies at an impressive level, providing superior acoustical performance, no matter the frequency. NRC 0.85 (ASTM C 423) SAA 0.86 (ASTM C 423).

Techstyle® E

NRC 0.85
SAA 0.86

Canvas
NRC 0.85
SAA 0.89

TECHSTYLE® WALL PANELS

Techstyle® wall panels offer three levels of sound absorption. All performance levels use the same front panel, but different backer.

- NRC 0.70: The simplest version is directly mounted to the wall with a 0.5" air gap and no backer. Total build up: 1.5".
- NRC 0.85: Directly mounted to the wall with a 1.5" total build up and the gap filled with a 0.5" formaldehyde-free fiberglass 4 pcf backer.
- NRC 1.00: Directly mounted to the wall with a 2" total build up and the gap filled with 1" fiberglass backer.

Hunter Douglas Ceilings utilizes metal, wood and fiberglass materials to design, engineer and manufacture ceiling systems that optimize interior environmental quality, material resources and energy usage. Hunter Douglas incorporates sustainable materials and employs sustainable practices in our manufacturing

processes. When applied as part of an overall building plan for new and renovation construction, solutions from Hunter Douglas may contribute to Green Globes and LEED BD+C and ID+C certification for schools, retail, hospitality, healthcare and commercial interiors.

DAYLIGHTING

Hunter Douglas ceilings diffuse glare for visual comfort and move daylight into a space, reducing energy used by artificial lights.

ACOUSTICAL COMFORT

Noise of equipment and conversation have been shown to impact worker comfort and productivity. Hunter Douglas acoustical ceilings have noise reduction coefficients (NRC) up to 0.85.

ENERGY PERFORMANCE

Interior spaces designed with light colors and a minimum of 70% reflectance on the ceilings and walls can reduce artificial and daylighting requirements significantly, reducing energy consumption.

INDOOR AIR QUALITY

Perfect for projects where air quality is a priority, nearly all Hunter Douglas products meet low emissions standards for GREENGUARD and GREENGUARD Gold certification.

RECYCLED CONTENT

Using both pre-consumer and post-consumer materials, many Hunter Douglas systems feature recycled components in steel, aluminum, and HDPE plastics.

BUILDING PRODUCT DISCLOSURE

Hunter Douglas Ceilings - use of products and materials for which life-cycle information is available and that have environmentally, economically, and socially preferable life-cycle impacts.

PARTNERS & PROGRAMS

USGBC

As a Platinum Member, Hunter Douglas is proud to partner with USGBC – a global movement of professionals, businesses, innovators and community leaders – in working to accomplish a single bold vision: healthy, efficient and equitable buildings and communities for all.

LEED

LEED is transforming the way we think about how building spaces are designed, constructed, maintained and operated. Hunter Douglas' continued research and development to create ceilings products that are more environmentally friendly contribute to the overall performance of a building, as well as to LEED certification by optimizing daylighting and improving acoustical comfort and energy efficiency.

ENVIRONMENTAL PRODUCT DECLARATION (EPD)

Hunter Douglas understands the importance of transparency to sustainable design and building. From raw material extraction through final disposal or reuse, we can provide life-cycle assessments on many of our products environment and health impacts.

ECOSCORECARD

Our ecoScorecard LEED calculator helps customers search and evaluate the impact of Hunter Douglas' ceilings products against leading environmental rating systems. Using the most up-to-date data in the marketplace, ecoScorecard provides clear, concise product information as well as supporting documentation.

GREENGUARD

Hunter Douglas is committed to meeting the growing demand for healthier, more sustainable products. Meeting the rigorous and comprehensive standards for low emissions of VOC's, our Greenguard Gold Certified ceilings contribute to the overall indoor air quality and general health of a building space.

FSC® CERTIFIED (FOREST STEWARDSHIP COUNCIL)

Hunter Douglas is committed to protecting our forests for future generations. Many of our wood veneers are FSC certified, including our Woodwright™ and Natura™ lines, which employ forest friendly resource management and help to reduce environmental impact by promoting responsible consumption. Hunter Douglas' FSC Chain of Custody Certificate # is SCS-COC-003509.
