Móz Metals

Perforated

Make the Light Move

Step away from the conventional and push the limits of your creativity. Perforated Móz™ Metals inspire your projects to levels of versatility like never before. Create light and movement and take an innovative approach to using traditional materials.

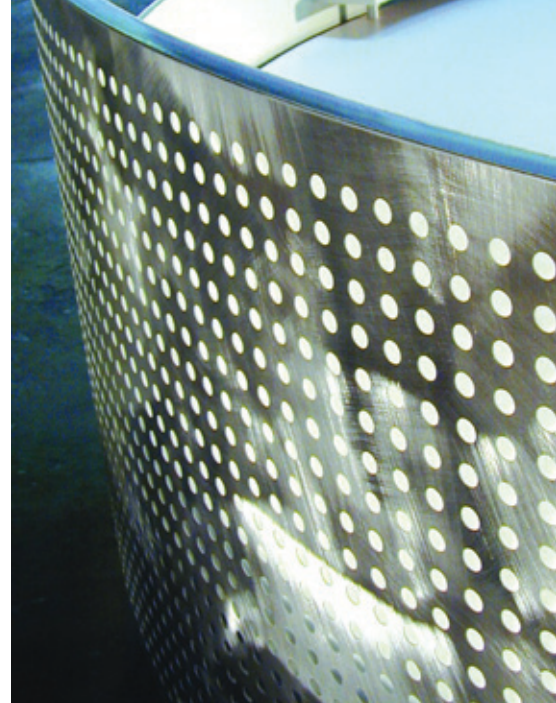

Description

Incorporating our perforated aluminum into your projects offers a wide array of unique visual effects, with versatility in architectural product applications. Combining our colors and hand-etched patterns on punched sheets create light, movement, and visual appeal. Utilizing Móz Metals perforated aluminum delivers a fresh perspective and our complete engineered systems provide ease of installation.

Uses

In Corporate, Institutional, Hotel, Restaurant and Residential industries, Móz Metals perforated aluminum is an excellent choice for column covers, acoustical walls, room and space dividers, ceilings and canopies, store fixtures, and more. Layer perforated aluminum with custom hole sizes and hole patterns and add illuminating effects. Create privacy while promoting ventilation and allowing light in your spaces. Combine corrugated aluminum with perforated material...the possibilities are endless.
