

Trims and Framing

For Móz Metal sheets

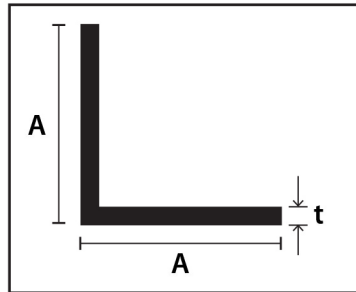

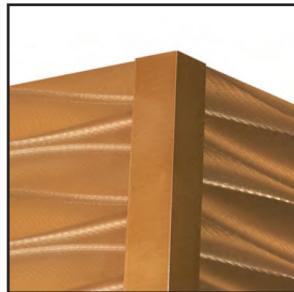

We offer three ways to complete an installation of Móz Metal sheets with Aluminum Corner, Seam, and Edge Frame Trims. Pre-finished in a Moz Classic color to match, trims come ready to cut and adhere in field covering joints, corners and edges for a more finished look. Available in Polycoat Gloss or Matte finish options.

Trims not available in Blendz, Graphix or Gradient colors instead choose a complimentary Classic Color. All Trims are sold in conjunction with Móz Metal sheets and not sold separately. Please contact us for pricing, minimum orders and lead times.

Aluminum Corner Trim

Cap corners to allow for flexibility in field cutting. Also great for use in high traffic areas.

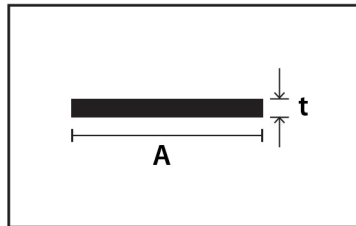

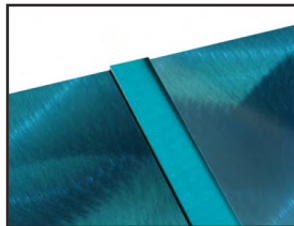

(A) Width	(t) Thickness
1"	0.125"
1.5"	0.125"
Available in 8' and 10' lengths	

Aluminum Seam Trim

Cover seams to create cohesion between directional patterns or create a framework appearance.

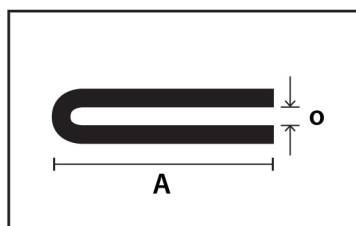

(A) Width	(t) Thickness
1"	0.125"
Available in 8' and 10' lengths	

3/4" Aluminum Edge Frame Trim

This trim sleeves the serrated edge of our perforated metals for a clean framed look.

(A) Width	(o) Opening
0.75"	0.063"
Available in 8' and 10' lengths
