Key Features of FiberBuilt Umbrellas

- Standard screw on finial. This feature allows for ease of changing the umbrella top.
- A maintenance-friendly yoke comes apart to allow easy access to the ribs.
- Flexible fiberglass ribs are resilient and durable. They withstand harsh weather conditions and do not mold, mildew, rust or rot.

Lucaya - Nitro - Quatro

- 1/2" diameter fiberglass ribs, using heavy duty nylon joints and end-tips.
- One piece pole 1 1/2" diameter is standard on Lucaya Umbrellas.
- .125 wall, powder-coated aluminum pole standard for Lucaya.

Garden - Patio - Market

- 3/8" diameter fiberglass ribs, using heavy duty nylon joints and end-tips.
- Two piece pole 1 3/8" diameter top, 1 1/2" diameter bottom is standard on Market, Garden and Patio Umbrellas.
- A heavy-duty crank is standard on Market, Garden and Patio Umbrellas.
- .065 wall, powder-coated aluminum pole standard for Garden and Patio.
- .080 wall, powder-coated aluminum pole standard for T9107MC and T9109MC Market extended pole available for bar height applications.

Umbrella poles are available as long extension poles for bar height tables for W900708, T9107MC and T9109MC. Add L to the end of model number when ordering - Example: W900708L

FiberBuilt Umbrellas are available in Market, Garden, Patio, Lucaya, Nitro and Quatro styles. Contact your sales representative for additional product information.
