## FEATURES

Heterogeneous construction provides high performance for durability and strength. The Realities Collection can withstand heavy rolling loads or high traffic areas with a static load limit of 750 PSI.

Providing the highest performance urethane finish in the industry, Quantum Guard™ HP is a patented urethane wearlayer with aluminum oxide cured by an ultraviolet process. It has exceptional wear resistance, stain resistance and lowers maintenance cost. With Quantum Guard™ HP there is a no polish, no buffing maintenance option.

Available in multiple widths – 6', 9' and 12' – resulting in less waste, fewer seams and greater ease of installation.

Solid weld rods are color-integrated to blend or create a monolithic appearance. They are used to accent a seam, enhance a border, outline an inset or used for wayfinding design.

Heat-welded seams provide an aseptic and integral surface that blocks the penetration of dirt and moisture. For optimal stain resistance performance, Mannington's Quantum Guard HP pen should be used to coat heat-welded seams. Heat-weld is the preferred method for healthcare and high traffic environments.

Limited 10 Year Quantum Guard HP Wear Warranty. Limited 10 Year Commercial Warranty.

- FloorScore certified for Indoor Air Quality– an independent 3rd party IAQ verification system for low emitting flooring. Approved as CHPS 01350 compliant and recognized in LEED IEQ Credit 4.3
- Manufactured in Salem, NJ and may contribute to LEED MR Credit 5
- ISO 14001 registered manufacturing facility
- Adhesive meets VOC content limit of SCAQMD Rule 1168 and may contribute to LEED IEQ Credit 4.1
- Made in the USA
