TerraMai Story

TerraMai works with top architects, designers, builders and manufacturers to provide one-of-a-kind reclaimed wood products for premiere commercial and residential projects. TerraMai's recent project list includes **Google, Morgans Hotel Group, HBO, The High Line, UC Berkeley, Starbucks, Amazon, REI, the San Francisco 49ers, YouTube, Ernst & Young** and hundreds more.

Our 20-plus years of experience, expertise and custom capabilities enable us to serve as a resource for leading architecture and design firms, such as **Gensler, Callison, Rockwell Group, HOK, Perkins+Will, Smith Group** and **Rapt Studio**. We also work directly with manufacturers, builders and homeowners.

TerraMai searches out the most beautiful, interesting and high-performing reclaimed woods from a variety of sources throughout the U.S. and abroad, including Asia, Africa and South America. TerraMai's international sourcing network is unmatched in the reclaimed wood industry.

Reclaimed wood offers a number of advantages over new wood, including beauty, story, and sustainability. TerraMai's unique range of reclaimed wood products spans the spectrum from clean and consistent to character-rich and eclectic. Most TerraMai woods are certified recycled according to **Forest Stewardship Council (FSC)** standards and can help a project earn points toward **Leadership in Energy and Environmental Design (LEED)** credits. Please contact us for details.

TerraMai's headquarters and plant in Southern Oregon houses more than one million board feet of reclaimed wood. Regardless of type or size of project, the beauty, value and soul of reclaimed wood is at the heart of everything we do.

Custom Designs

We love custom projects! Collaborating with designers to help achieve their design vision is what we enjoy most and we believe do better than anyone in the business. We are privileged to work with some of the most talented designers in the world on a daily basis. Don't see what you're looking for here? From counters to tables to benches, if you've got a need, let's talk.

Table Top Construction

Edge-joined plank construction.

Plank Width & Pattern

Standard plank widths are 3", 4" and 5". Each individual top may be constructed using all three widths. Single-width construction is available.

Millwork – Surface

Top faces are offered either surfaced smooth or with the naturally distressed patina left partially intact. The naturally distressed option allows the wood to show more character, while still providing a surface face appropriate for most work environments. All tops are surfaced smooth on the underside to prevent clothing and other snags.

Millwork – Edges

Edges are offered surfaced smooth or with the original naturally distressed patina left intact. All edges are eased at approximately 1/8" radius.

Finishes

Standard finish options include natural oil or water-based polyurethane. All finishes are low-VOC. Some standard color options are offered in specific species. Custom colors and finishes are available. Please call for information. Note that variations in finish color will occur due to the natural characteristics of the wood. Please see the "*Care & Maintenance*" section on page 4 to help select a finish that best suits your needs.

General Information

Prices published in this Price List are subject to change without notice. We reserve the right to correct typographical or printing errors.

TerraMai will provide a written order acknowledgement with an approximate shipping date for all booked orders. Please check all product specifications and acknowledgements carefully for accuracy. Cancellations will not be accepted after an order has been entered and ship-date assigned. To match a previously shipped order, please reference your original order on your new purchase order.

Email orders to: info@TerraMai.com

Fax orders to: 541.973.2308

Pricing & Terms

- All pricing presented in this Price List is net pricing (not list).
- Orders shipping within two weeks OR orders of less than \$10,000 (including materials, taxes, shipping, handling and insurance) are payable 100% at the time of order. These orders are payable by check, wire transfer or by credit card.
- Standard lead-time orders of \$10,000 or more are payable 50% at the time of order, with the balance due five business days prior to shipment (ten business days prior to international shipment if shipment is international). These orders are payable by check or wire transfer (due to the cost of credit card processing fees – typically 4% of the charged amount – we are not able to accept credit cards on orders of \$10,000 or more without an additional 4% fee).

TerraMai charges California and New York customers (without a resale certificate) the state mandated rate of 7.5% California sales tax and 8.875% New York sales tax. California and New York customers are responsible for any additional local/regional sales tax, if applicable. Additionally, shipments to Hawaii and Canada are subject to certain mandated sales taxes and/or import taxes.

Lead Times

Standard production lead-time is 6 to 8 weeks from the date the order is booked by TerraMai. A booked order consists of a signed Materials Bid and appropriate payment as specified in the TerraMai Materials Bid. TerraMai will issue an order acknowledgement within 48 hours of booking your order. Accelerated lead-times and expedites may be available (with upcharge). Please check with TerraMai for availability.

Shipping & Handling

TerraMai ships materials FOB from one or more of our plant/warehouse locations. Shipping, Handling and Insurance (SH&I) costs will be included in the TerraMai Materials Bid.

Delivery means dock to dock and does not include inside delivery or installation. If delivery is to be made somewhere other than dealer warehouse, please notify TerraMai in writing with the name and telephone number of delivery contact. Please note that if the Ship To address on your signed Materials Bid is incorrect and the material needs to be delivered to a different address, additional charges will apply.

Product must be inspected at the time of delivery. If problems or damages result during shipment they must be noted and signed for on the drivers' copy of the packing slip in order to file a claim. Please contact TerraMai immediately (and certainly within one week) with any questions or concerns upon receipt of product.

Material Variability & Samples

Wood is a natural material and varies in color, grain and other characteristics. This natural variation is part of wood's inherent beauty. Reclaimed wood may show additional character and variation based on its prior history and use, including mortise pockets, nail holes, bolt holes, oxide stains, seasoning checks and more. This reclaimed character enhances the wood's natural beauty and testifies to its prior history, adding visual richness and soul to any space.

Due to wood's inherent variability, individual table and finish samples cannot be expected to fully represent or precisely match the actual product.

Warranty

TerraMai warrants its products are free from structural defects in materials and workmanship for a period of five (5) years. Natural variations in wood shall not be considered defects. Warranty does not apply to normal wear and tear or improper use or installation. Please note that structural durability and stability of table products depend on the specific base that is used. As a result, the complete table is exempt from this warranty.

See TerraMai Materials Bid and warranty documents for full details.

Care & Maintenance

The degree of wear to both the finish and the wood can vary dramatically from one project to another based on environment, use, sun exposure and other factors. A wood finishing professional with first-hand knowledge of the project is best able to advise on long-term maintenance and refinishing.

For general care and maintenance, dust and wipe down the table top with a damp cloth with the grain of the wood. Do not use commercial spray cleaners such as Endust or Pledge or bleach-based cleaners. They can dull and cloud the finish.

Oil Finish

Oil repels water and liquids, but is not an inherently stain resistant finish. Spot treat scratches and dents with an oil-dampened cotton cloth. Buff until the scratch disappears and the freshly applied oil blends with the existing finish. Tops should be re-oiled at least once per year, or as needed, to ensure the wood looks it's best and is protected from spills and other mishaps. Oil finished wood will continue to take on patina and character over time and acquire more beauty with age. Please see TerraMai Warranty & Care documents for more detailed information.

Polyurethane Finish

Polyurethane seals and protects wood, providing a high level of protection against stains. To remove scratches, dents and other blemishes, the top will need to be sanded and an additional coat of polyurethane applied. Tops should be sanded and re-finished, as needed depending on factors such as use, application and environment. Please see TerraMai Warranty & Care documents for more detailed information.

Care & Maintenance Products

- The wood finish company Bona provides a complete line of industry-standard care and maintenance products designed for polyurethane finishes (www.bona.com).
- The wood finish company Rubio provides a range of high-quality, low-VOC care and maintenance products designed for oil finishes (www.rubiomonocoatusa.com).
- Consult a finish professional for advice on care and maintenance products best suited to specific installations.

Specification Guide

To order, please specify product SKU number according to following guide:

1. Product Prefix
2. Wood Type
3. Dimension
4. Surfaced Smooth Face Option
5. Edge Option
6. Finish Option

Specifying Example:

Product SKU Example: TT-TK-48x72-SSF-NDE-OC

1. TT	Table Top
2. TK	Teak
3. 48" x 72"	Width x Length
4. SSF	Surfaced Smooth Face
5. NDE	Naturally Distressed Edge
6. OC	Oil Clear

CT-AC*	20"	120"	1 3/4"	\$1,158	\$1,283

Acacia

TerraMai's Acacia table and counter tops come from orchard-salvaged acacia from Southeast Asia. This tropical hardwood offers rich medium brown color tones and interesting grain patterns. The acacia tree has been used as a source of shellac for thousands of years. Tannins from the tree are used in pharmaceuticals and as a food ingredient. The shoots, seeds and berries are also used in Southeast Asian cuisine. Acacia trees grow quickly and are culled from orchards after about 40 years of service, once they no longer produce shellac.

Surface Face Options:

Surfaced Smooth Face (SSF)

Edge Options:

Surfaced Smooth Edge (SSE)

Live Edge* (LE)

**Note: This is the only TerraMai species that offers a 'Live Edge' from the actual tree. Counter Top sizes are only available with Live Edge.*

Teak

TerraMai's reclaimed Teak table tops come from aging buildings, houses and other structures in Southeast Asia. Known as the "King of Woods", teak is prized throughout the world for its legendary beauty and durability. New, plantation teak cannot compare to old-growth Asian teak in either looks or performance. Teak is able to withstand sun, sea and just about anything Mother Nature has to offer. TerraMai's reclaimed teak tabletops can certainly handle a little spilled coffee.

Tropical Slabs

TerraMai's reclaimed tropical slab tops come from an old manor house in Southeast Asia. The quantity is limited and there's nothing else like them this side of the Pacific. They come with an authentic patina and texture acquired over decades. Once remilled, they reveal lustrous, dark burgundy and auburn color tones. These unique tropical hardwood slabs are true showpieces. In addition to tables, they're also ideal for counter tops, bar tops and more.

World Mix

TerraMai's World Mix table tops come from an eclectic mix of exotic hardwoods reclaimed from the international shipping industry. Our World Mix includes dozens of exotic hardwood species with an incredible variety of color and grain pattern. These woods were originally selected for their extreme hardness and ability to withstand the punishing conditions inherent in global industrial shipping.

rePLY

TerraMai's rePLY table tops are handcrafted from material reclaimed from the industrial manufacture of large-dimension plywood beams. This material yields a unique look, with a subtle yet striking 'stripe' effect reminiscent of textiles and fabrics. TerraMai diverts this material directly from the waste stream. rePLY's distinct, modern aesthetic make it a compelling new product.

Douglas Fir

TerraMai's Douglas Fir table tops come from material reclaimed from vintage barns, industrial buildings and other structures throughout western North America. Douglas fir has been the building material of choice in the western U.S. for decades due to its strength, workability and classic good looks. TerraMai offers Douglas fir tops in both white and ebony tints and stains to augment the wood's natural beauty and character.

White Oak

TerraMai's white oak table tops come from vintage barns, horse fencing, shipping material and other sources from the eastern U.S. White Oak is valued for its muted color tones and its hardness. The neutral color spectrum of white oak enables it to work beautifully with virtually any color pallet, no matter how vibrant or varied. This versatility has made white oak a go-to wood for designers. The history and pedigree of TerraMai's reclaimed oak only add to this wood's enduring allure.

Oak

TerraMai's reclaimed oak table tops come from 19th-century barns and other structures from the eastern U.S. The oak reclaimed from these vintage structures adds instant soul to even the sleekest modern space. TerraMai offers our oak tops in both white and ebony tinted oils and stains to accentuate the wood's unique grain and character.

Surface Face Options:

Surfaced Smooth Face (SSF)

Naturally Distressed Face* (NDF) **available in Oil finish only*

Edge Options:

Surfaced Smooth Edge (SSE)

Naturally Distressed Edge (NDE)

Redwood

TerraMai's reclaimed redwood tabletops come from a variety of sources – old wine tanks, barns, bridges, zeppelin hangars, hops poles and more. Redwood's renowned ability to withstand rot and decay make it an ideal material for exterior installations, such as outdoor dining. These unique natural properties, combined with the wood's inherent beauty, threatened the very existence of the extraordinary old-growth redwood stands found only in Northern California. Thankfully these last remaining stands are now protected, which makes old-growth redwood of this quality available only in reclaimed wood.

Surface Face Options:

Surfaced Smooth Face (SSF)

Edge Options:

Surfaced Smooth Edge (SSE)

Finish Options:
