Printed on Finch Premium Blend which contains a
minimum of 30% post-consumer recovered fiber.

DSC Axis 106

A design classic, the DSC Axis 106's seat and backrest are constructed of molded plywood in either upholstered fabric over polyurethane foam padding or a natural beech veneer. The armrests are upholstered over polyurethane foam.

Accessories include armrests, folding writing tablets, document racks, place markers, and chair dollies. Also available with an anti-panic, fold-away writing tablet that allows users to easily exit the chair.

Giancarlo Piretti,
1965

Over 40 years ago a brilliant yet unknown designer worked in the research and design department of the Castelli (now Haworth) furniture manufacturer. Giancarlo Piretti's belief in simplicity and his thoughtful use of materials eventually made his name synonymous with Italian furniture design. During his twelve years with Castelli, Piretti developed countless innovative furniture designs, primarily in seating, including the legendary Plia® chair. In 1988, he introduced his Piretti Collection, a series with over 50 different office chairs and seating ensembles.

The DSC Axis 106 is a pure, ergonomic stacking chair. Generations of architects and interior designers have recognized the chair as being extremely functional and long-lasting. This chair proves that Italian design is based on more than just aesthetics and creativity. Functionality, longevity, cost-effectiveness, and usefulness are all joined to create a beautiful, highly efficient chair.
