

## Sit-to-Stand Worksurface

Allsteel's sit-to-stand worksurface accommodates the individual, not to mention your bottom line.

Allsteel's sit-to-stand worksurface provides the perfect combination of sleek styling and user-controlled functionality. It can be installed at any height on the panel and adjusts as easily as a keyboard tray within a 14" range. The innovative design mounts directly to the panel, eliminating the need for an obtrusive base. A simple paddle adjusts the mechanism, without the use of power.

Your decision to select a height-adjustable worksurface is about more than just accommodating the individual. It's a choice that can affect health, safety, and productivity, and especially make a difference to your bottom line.

In fact, user-adjustable furniture results in lower total cost of ownership over time: adjustable ergonomic furniture, coupled with user training, results in an average decrease of 80% on cost-per-workers' compensation claims and a decrease of 60% in the number of claims. (Washington State Department of Labor)

Allsteel's sit-to-stand worksurface offers the best ergonomic benefits for your employees. Plus, it works harder for you, supporting telecommuters and multi-shift use. It's the perfect way to increase worker satisfaction and productivity.

# Allsteel sit-to-stand workspace.

## Satisfaction, productivity, and style made easy.

Designed to work with Stride® and Terrace DNA™, the sit-to-stand mount attaches directly to panel slots at any height for user-controlled workspace adjustment. It can be installed at any 1" increment on the panel. Once installed, the user can easily adjust the workspace height within a 14" range. The sit-to-stand mount is designed for use with 48", 54", or 60" wide by 24" deep workspaces.\*

\*Workspace width is undersized by 1" on each side to allow for easy movement.

### Specifications:

- Sit-to-stand option gives the user a 14" adjustment range.
- Attaches to the panel slots at any 1" increment, providing additional workspace placement flexibility.
- Panel mounting eliminates the need for a base, so leg room is not impeded.
- Gas-assisted mechanism easily adjusts by activating the paddle; no crank knob or electricity is used.
- Workspace moves directly up and down, so user is not pushed away from computer monitor or paperwork, maintaining workspace footprint.
- Maximum static load for workspace is 250 lbs. when in a fixed position.
- Cover around the mechanism eliminates pinch points.
- Adjusts within BIFMA G1-2002 Ergonomic Guidelines.

All together now.

At Allsteel, we believe that together, if we widen our view, we can make a real and lasting difference for our environment. That's why we ensure that all materials balance performance and environmental responsibility. Relevant, durable, high-quality products, backed by Allsteel's Lifetime Warranty, guarantee years of use and reuse.
