

Stride® Benching

Allsteel®

Encourage collaborative teams. Accommodate mobile workers.

For organizations adopting mobility programs or worksetting-based planning, Benching is an excellent application to enhance a range of options. Stride Benching not only encourages a feeling of community through seated proximity, it makes a vivid visual and functional statement about collaboration. An application for team-based office environments fosters creativity by eliminating barriers to teamwork and is ideal for spaces where the free flow of information is critical.

Space can be appropriately allocated for users who spend the majority of their day out of the office or away from their workspace. And it's ideal for touching down with easy plug-and-play power access.

In addition to highly collaborative teams and mobile workers, Benching is an inspired solution for libraries, laboratories, financial firms, creative agencies, higher education, and a host of non-traditional office settings.

Easy-to-access power
beneath hinged doors

54", 60", 72" widths

15' expanse without
intermediate support

Length available in 12" increments

Simplification of form. Subtleness of strength.

Stride Benching can be scaled to meet the diverse needs of a variety of workers. Featuring unique storage, a range of separation options, and exceptionally easy access to power, Stride Benching provides ample user flexibility while supporting growth or change within the organization.

SPACE

- Spanning 15 feet without the need for intermediate support, the understructure supports the Bench while hiding discreetly from view.
- Open and closed leg designs provide options for planning space.

SEPARATION

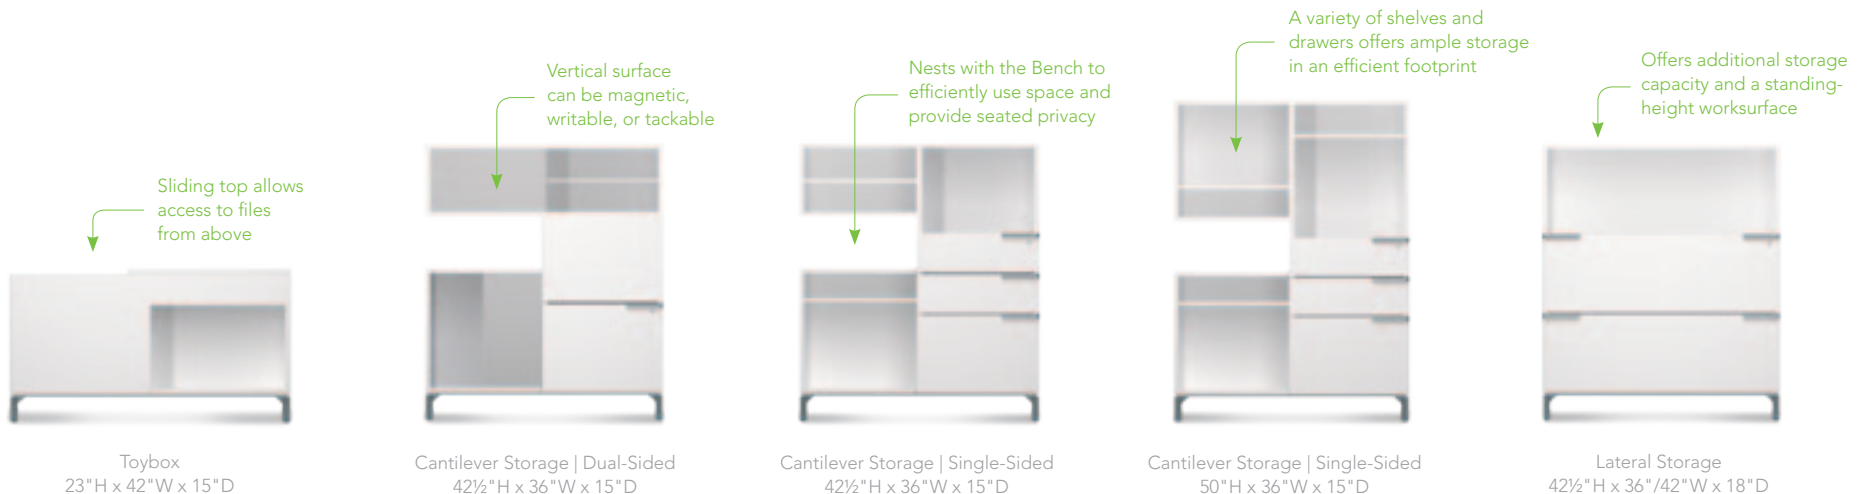

- Privacy levels can vary by using center or lateral divider screens, secondary worksurfaces, and unique storage elements.
- Center screens, available in 13 and 20½ inch heights, work harder than just dividing space. Every surface is optimized for efficient use of space. Positioned along the trough, center screens support paper management tools or monitors, provide a tackable surface, or beautifully divide space with glass. Lateral divider screens help define work areas and offer a writable surface.
- Storage offers magnetic, writable, or tackable vertical surfaces and soft, horizontal surfaces for seating.

POWER

- The power and data interface is hidden beneath elegant hinged doors while remaining easily accessible for users to plug and play throughout the day.
- No matter where the user sits along the Bench, ease of access is maintained.

STORAGE

- In tight spaces, storage is within arm's reach but not in the way.
- The toybox provides access to files from the top, eliminating kneespace intrusion of doors and drawers.
- Cantilever storage uniquely combines personal storage and space division.
- Standing-height lateral storage can run parallel to the Bench as shared file centers and hubs for impromptu meetings.

Stride

Take your environment further.

Discover a streamlined, versatile solution for today's changing workspace and workstyles.

With today's shifting business environment and evolving workforce, alternatives to traditional workspaces have become a must. At Allsteel, we searched for new ways to foster creativity in team-based environments and to help mobile workers feel more comfortable and productive, no matter where they landed for the day. The solution? Stride Benching, a new-generation worksetting well-suited for a flexible, collaborative environment, complete with unique ideas for integrating storage. The newest addition to the Stride collection offers simplicity of design and blends cohesively with the full Stride offering. So it not only helps organizations meet their changing needs, it's easy to blend applications to create one beautiful, functional, inspiring space.
