

VIP White Boards

VIP White Boards

design: Friis & Moltke

> The porcelain enamel steel surface of the VIP Whiteboard is easy to write on and conveys information in a way that facilitates reading. The surface retains magnets, is impact resistant and scratch proof to ensure maximum durability. The VIP Whiteboard has a sliding track allowing it to be combined with other boards in the system, ensuring practical and elegant design.

Finish:

Matte anodized aluminum frame

e3™ Porcelain Enamel Steel Whiteboards & Chalkboards Fact Sheet

eisysVISUAL e3 Porcelain Enamel Whiteboards stand up to the rigors of both office and classroom. It's ability to outperform all other whiteboard surfaces has made it the most popular whiteboard and chalkboard surface in the world.

Typically 4 white surfaces are available (though only 3 are approved for North America):
Ultra Gloss – High Gloss – Satin Gloss (eisys Standard) – Low Gloss (not approved)

It's guaranteed to be scratch, stain and fade resistant. It delivers a consistently smooth writing experience and unmatched erasability.

e3 boards can be written on with dry-erase, semi-permanent, water-soluble or permanent marker, chalk, pen or crayon without damaging the surface.

e3 Porcelain Enamel Steel boards are 99.9% recyclable and is the only globally Cradle to Cradle Certified^{CM} Silver surface of its kind. It's safe and clean, and emits no harmful chemicals into the environment.

e3 Advantages

- > Ultra smooth writing surface
- > Optimum erasability
- > Scratch, fire, bacteria and chemical resistant
- > Greater color contrast
- > Forever Warranty
- > Minimal surface/light distortion
- > Enhanced visibility and optimum eye comfort
- > Safe and Clean: Cradle to Cradle Certified^{CM} Silver, emits less chalk dust

Chemical Resistant

Scratch Resistant

Bacteria Resistant

Fire Resistant

Graffiti Resistant

Stain Resistant

Environmental Features:

- > Enamel fused to cold-rolled enamelling grade steel
- > In all coatings, total amount of heavy metals:
cadmium, mercury, hexavalent chromium and
lead less than 0.1%
