

20.5 MM

DARK ASH PLANK

SOLID HARDWOOD
FLOORING

STYLE CHART

B 5.9

Ash (*Fraxinus Excelsior*) is one of the large European and North American hardwood species. Dark Ash has a very characteristic and vivid appearance with a beautiful contrast between the dark brown heartwood and the light parts of the wood. Over time, the glow of the Dark Ash becomes a little deeper which only enhances the character and the beauty of this unique wood species.

Junckers solid hardwood flooring is produced and categorized according to Junckers factory standards and in accordance with EN 13226 and EN 14342. Junckers floors are made exclusively from solid hardwood, with all the characteristics typical of this natural material. Each style will display a unique range of grain and colour characteristics. The photographs are designed to show the average appearance of the style and species. It is normal to see a variance in appearance between individual boards and packs. Up to 5% of the boards may contain features of the next style. Floors laid at differing times may vary slightly because of this average grading. Hardwood floors may fade and change colour over time, especially when exposed directly to sunlight.
