Dichrolam™ Red and Green

John Blazy Designs' Dichrolam™ glass is a proven and trusted product that continues to bring wonder to building occupants and visitors alike. The beauty and wonderment of Dichrolam™ is in the angles. As a person moves and views the glass from different angles they will see different colors being transmitted as well as different opacity levels. In other words, two persons at different points can be viewing the same glass, yet be seeing different colors emitting from the glass. Moreover, Dichrolam™ is also durable. It is made with glass, lamination inter-layers, and film products that will not diminish over time. Dichrolam™ will maintain its vibrancy and luster for decades.

Transmission Colors

Dichrolam Red

aqua blue/green, deep blue, magenta, while reflection color will be copper/red shifting through yellow/gold and into green at skew angles.

Dichrolam Green

magenta /purple, orange, yellow, while reflection color will be green shifting into deep blue at skew angles.

Dichrolam™ Red and Green

Dichrolam Red. Handrail at Hard Rock Hotel & Casino, Tampa, FL.

Dichrolam™ Red and Green

Cost Summary (US Funds)

There are several factors that determine the price of these products. These factors are material thickness, edge work, total square footage (SF), shape, warranty length, and material used.

Plastic: \$25 - \$45 SF

Glass: \$40 - \$80 SF

Interior and Exterior Applications

Store-fronts, Skylights, Partitions, Transoms, Counter Tops, Skylights, Windows, Dividers, Side-lights, Hand rails, and more.

Warranty

We offer a one year limited warranty on these products. For terms and conditions please see our Dichrolam™ Statute of Limitations.

Cleaning Instructions

For our glass based products, we recommend using vinegar based cleaner with a lint free applicator. However, ammonia based cleaners can also be used with this product. If the base substrate is plastic then we recommend plastic based compatible cleaners. Isopropyl alcohol is strongest solvent recommended for plastic based Dichrolam™ – no MEK, acetone or similar solvents. Abrasive cleaners, strong ammonia or alkaline solutions should always be avoided unless glass based products are used.

Installation Instructions

Dichrolam™ series installation procedures are like any other glazing product. In the case of edge lighting and back lighting these products, we will add a light diffuser to the glass make up to enhance the lighting affects. We highly recommend that the light diffuser be part of the glass make up rather than a separate item.
