HP-4 Recessed with Regressed Lens 1" T-bar Starter/Independent Installation Instructions

Step 1

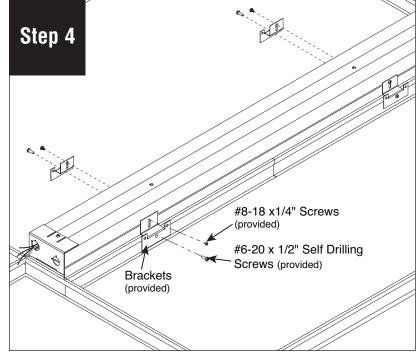

Remove lens and set aside to prevent it from getting dirty or damaged.

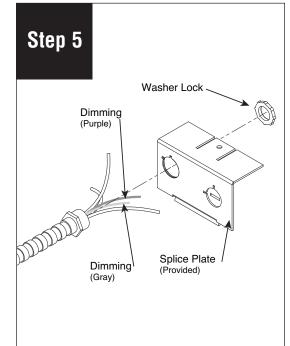

Configure T-Grid to fixture size and leave an opening for luminaire. As noted above.

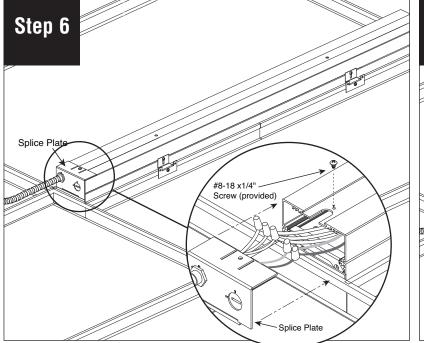

Place fixture on T-Grid.

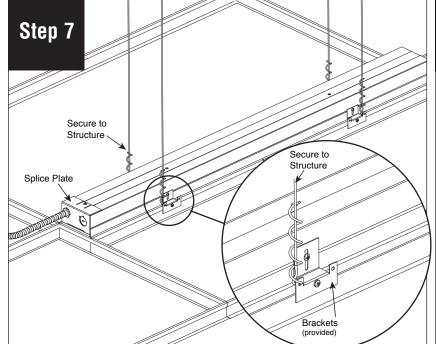

Secure luminaire on T-Grid using provided brackets and screws. Use $\#8-18 \times 1/4$ " screws (provided) to attach bracket to luminaire and $\#6-20 \times 1/2$ " self drilling screws (provided) to attach to T-Grid.

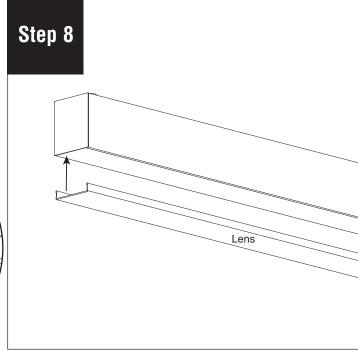

Remove splice plate from end of fixture and insert conduit through splice plate. Secure conduit with lock nut.

Make electrical connections and re-install splice plate to fixture.

Secure luminaire to building structure, as per code.

Reinstall lens and turn power on.

Note: All power connections to be installed to local/national codes by a Certified Electrician.

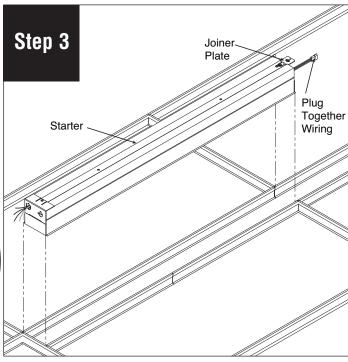

Remove lens and set aside to prevent it from getting dirty

or damaged.

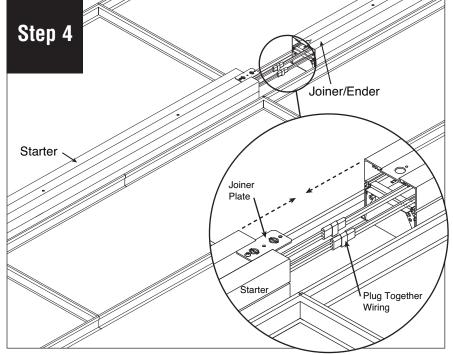

HP-4 Recessed with Regressed Lens 1" T-bar Joiner Installation Instructions

Step 2 Step 2 Center-to-center T-Grid spacing. For 1" T-Bars.

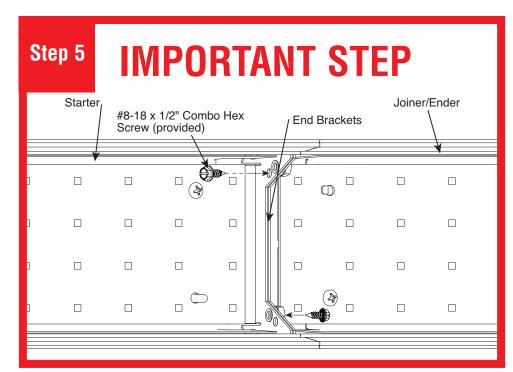

Configure T-Grid to fixture size and leave an opening for luminaire. As noted above.

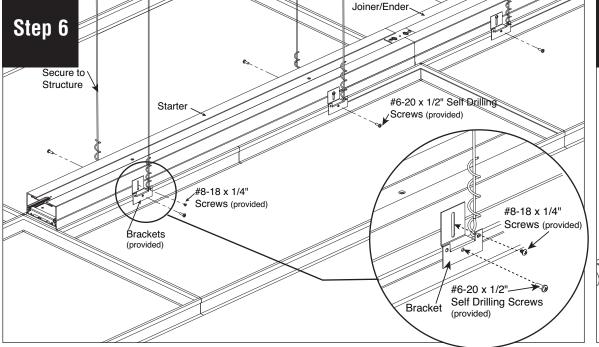

Place fixture on T-Grid.

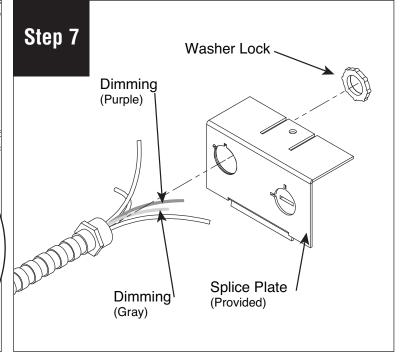

Connect Plug Together Wiring and align joiner/ender with joiner plate and carefully slide starter and joiner/ender together.

Install 2 $\#8-18 \times 1/2$ " Combo Hex Screws (provided) into end bracket as shown. Screws can be installed from the left or right.

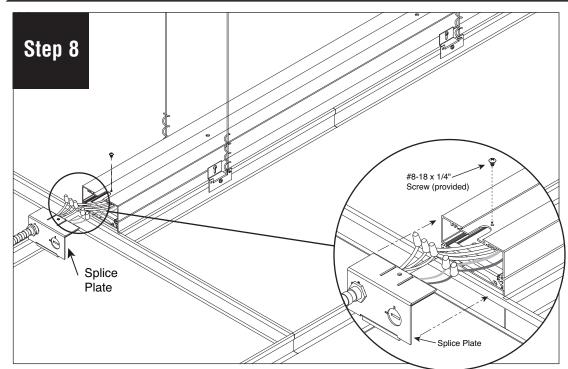

Secure all fixtures to T-Grid by driving #6-20 x 1/2" self drilling screws (provided) through brackets into T-Grid. Connect all fixtures to building structure, as per code. Use #8-18 x 1/4" screws (provided) to install brackets on fixtures.

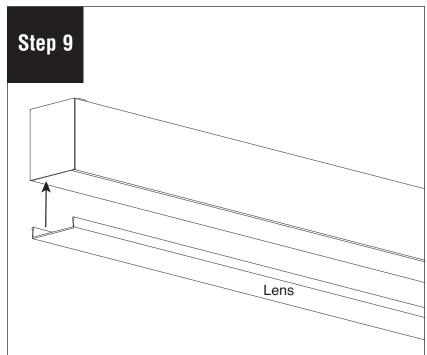

Remove splice plate from end of the fixture and insert conduit through splice plate and secure.

Note: All power connections to be installed to local/national codes by a Certified Electrician.
