Date Drawn: 3/24/08

TYPICAL FIXTURE

1. Lower frame assembly by loosening captive nuts at top of upper housing.
2. Remove wireway cover by loosening screws and sliding cover.
3. Remove mounting plate assembly and attach to junction box (by others) and to structure through auxiliary mounting holes.
4. Lift upper housing assembly over mounting plate assembly and attach with nuts and lock washers provided.
5. Make all wire connections in accordance with all national and local codes.
6. Replace wireway cover and tighten screws.
7. Install lamps.
8. Raise frame assembly and align screws with captive nuts in upper housing and tighten.
Note: Be sure to align so that clearance holes on frame assembly are in line with any hardware protruding on inside of upper housing.

 When using electrical equipment, basic safety precautions should always be followed, including the following:

- Read all instructions carefully before installing and save for future use.
- Make sure all connections are in accordance with the National Electrical Code and local regulations.
- To avoid possible electric shock, be sure the power supply is turned off before servicing or installing the fixture.
- Service should be performed by qualified personnel.
- These instructions may not cover all details or variations. If additional information is needed, please contact Visa Lighting.
