## MOUNTING INFINITY ART ARCS

1. Depending on the length of the screws supplied with the junction box (by others) you may need to use the longer screws provided. Fasten cast swivel plate to junction box.
2. For drywall ceilings drill clearance hole for toggle bolt per chart on center from center of junction box. For suspended ceilings install 512 HD caddy clip (by others) on center from center of junction box (dimensions on page 2) and supply a 1/4-20 all thread drop through ceiling. Install griplock assembly keeping trimwasher to the ceiling side and tighten.
3. While supporting far end of fixture, lift other fixture end and swivel ball through slot in the cast swivel plate and drop into center hub, aligning anti-rotation groove in swivel ball with tab in the cast swivel plate.
4. Fasten retainer to cast swivel plate with screws provided.
5. Lift far end of fixture and push 1/16 stainless steel cable into griplock assembly. Level fixture by adjusting griplock assembly and other griplock positions.
6. Make all wire connections per local and national codes.
7. Lift canopy in place and secure with set screws (2) provided.

When using electrical equipment, basic safety precautions should always be followed, including the following:

- Read all instructions carefully before installing and save for future use.
- Make sure all connections are in accordance with the National Electrical Code and local regulations.
- To avoid possible electric shock, be sure the power supply is turned off before servicing or installing the fixture.
- Service should be performed by qualified personnel.
- These instructions may not cover all details or variations. If additional information is needed, please contact Visa Lighting.
