Like all Herman Miller products, CLT tables are durable for long-term performance and value. As a statement of our confidence in their quality, CLT tables are covered by the Herman Miller Warranty—a straightforward promise that we stand behind that quality 100 percent. The 12-year, 3-shift warranty covers all standard elements and includes labor on all warranty work.

Superior from bottom to top

Bases—Made from 14-gauge steel for strength and durability. Leg columns and feet are bonded by a brazing process that creates a seamless look with superb structural integrity. Seven base colors match Herman Miller seating.

Fixed legs—Unitized construction of the column, feet, and 1⁄4-inch-thick attachment plate ensures stability. Pedal and circle bases are also available.

Folding leg assemblies—Held securely in the locked position by spring force and a cam-lock. The lock is designed to be quickly released by hand or foot, so a person can easily fold the legs from a standing position. With its thin profile, the folding mechanism leaves plenty of knee clearance and takes up less storage space.

Glides—Allow 1 1⁄2 inches of adjustment. They are threaded into an innovative riv-nut housing for added strength and resistance to bending.

Tops—Available in 8 shapes and 73 sizes. Tops can be standard or lightweight (30 percent lighter) in any Herman Miller laminate. The choice of 50 edge styles includes laminate, bullnose or squared vinyl, bullnose or beveled wood, and wood band.

Ganging plate—Automatically aligns surfaces and locks them together. The nonhanded, quick-connect plate makes it easy to gang tables in any configuration.

Modesty panel—Optional 6 1⁄2-inch-high panel folds under the top, so it stays with the table during transport and storage.

Power and data at the table top—Flip-up modules open work surface access to power and data, especially important in training applications. The modules close flush with the work surface, so the table can be folded and stored with the module in place. Grommets, under-table troughs, and leg-attached wireways route cables. A metal divider within the trough separates power and data. Each module contains a duplex outlet and two data ports.

Easy transport—A felt-padded table dolly moves and stores up to six tables of any size.
**BRINGING MORE TO THE TABLE**

To help a workplace run productively, CLT tables are designed specifically for conferences, learning, and training, as well as team projects and collaboration. CLT tables set up easily, store efficiently, and conveniently support technology. These workhorses can be grouped, ganged, reconfigured, frequently moved, or kept in one place. And the tables fit right in with Herman Miller systems, furniture, and seating.

**THOUSANDS OF POSSIBILITIES**

With more than 4,500 combinations of size, shape, power and data access, and other features possible, CLT tables can fit any space, do any job, and meet any budget.
