

Goodbye workplace. Hello mindspace.

Kimball®Office | HUM. MINDS AT WORK.®

It's less about an open plan. And more about an open mind.

Furniture has always been made to fit our bodies. But why hasn't it been designed to fit our minds? That's the profound premise which launched over 4.5 years and 84,000 hours of research in the area of cognitive ergonomics. The result is Hum: a sustainable open plan system created for individual focus, collaborative tasks and everything in between.

Hum works the way the mind works. It's manufactured to be a green building solution. And it includes configurations for every kind of workplace.

HUM. MINDS AT WORK.

From I to we. From you to us. From apart to together. Collaboration has a name. And it's name is Hum. By way of proper introductions, Hum is brought to you by Kimball Office as an answer to increasing the creativity, productivity and all-out brain power in your work environments.

4
Person
Cluster.

Hum for collaborative and interactive work.

People work alone. People work together. Hum helps people switch modes without changing place. And without changing pace.

The Hum 6-person cluster is ideal for teams that spend most of their time working together. Low screens with open sight lines encourage team interaction. There are defined spaces to interact quickly and even host visitors.

Hum for teamwork and focus.

Hum understands how people work and what they need to work better. It echoes the way our minds organize, coordinate and collaborate.

For teams that split their time evenly between collaborating and concentrating, the Hum 4-person cluster offers plenty of space to interact with team members, while See Me screens help filter out distractions so individuals can focus.

HUM. MINDS AT WORK.

From I to we. From you to us. From apart to together. Collaboration has a name. And it's name is Hum. By way of proper introductions, Hum is brought to you by Kimball Office as an answer to increasing the creativity, productivity and all-out brain power in your work environments.

from many
to one

1 Person
Stand-alone.

Hum for private efforts.

From one to many. From many to one. Hum stand-alone is for solitary tasks that require individuals to spend most of their time on private work or managing efforts outside of the collaborative team.

Hum for the smartest use
of every space.

Perimeter stations offer concentration and collaboration, while maximizing your floorplan. One-sided stations can be used against walls or in corridor applications to fully utilize an office space.

Single-Sided
Station

big picture thinking

3
Person
120° Cluster.

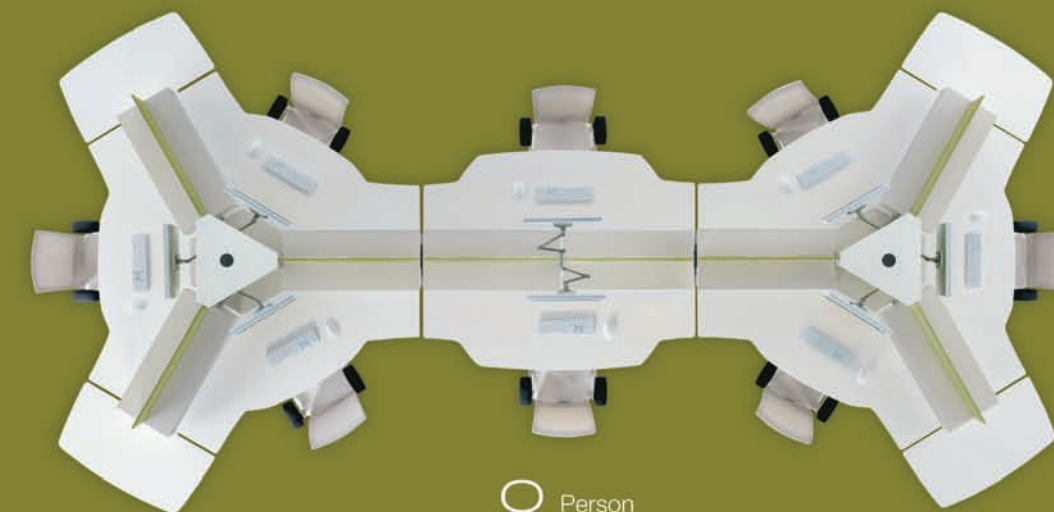

Hum for independent thought.

The Hum 120° 3-person cluster was created for teams that spend most of their time on individual tasks, but occasionally need to meet with others. Its shape allows everything to be within reach. Central screens block distractions.

Hum for total flexibility.

Hum is an adaptable solution. It works in tight spots and out in the open. Hum delivers for individual needs, different teams and whole organizations.

In its 8-person incarnation, Hum is ideal for larger teams where everyone needs something slightly different. Personal spaces, terraces, screens, and accessories abound—and all can be selected to suit personal preferences.

Do you hum, yet?

Hum is the sound of a team working well, individually and together. Hum resonates with creative inspiration and sustainable design. And, Hum has even more possibilities than we've covered here. Contact us to see, and hear, and hum a little more. www.kimballooffice.com
