

1

Ensure that the power to the fixture's circuit is turned off. Open the door (A) by pulling down on one side, marked with a white dot, to gain access to the lamps.

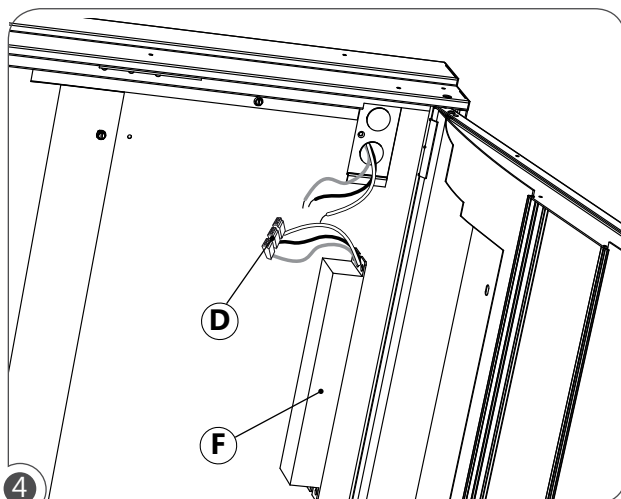

2

Remove lamps (B) from the fixture.

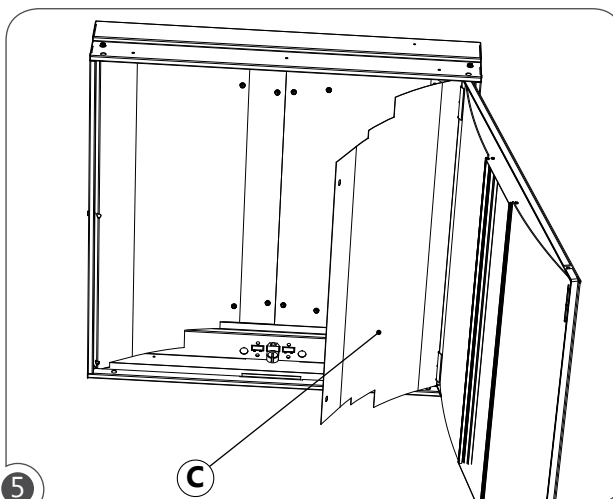

3

The ballast is always positioned on the hinge side of the door. Unscrew the reflector (C) with a screwdriver.

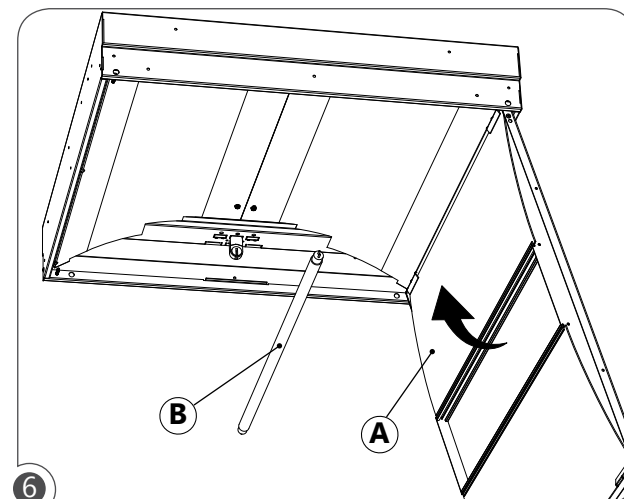

4

Unscrew the wire nuts (D). Unscrew the ballast (F) from the fixture. Replace the ballast and make connection with wire nuts.

5

Screw the reflector (C) back into position with a screwdriver.

6

Reinstall the lamps (B) and close the door (A) by snapping back into place.
