WoodWorks® Custom Installation – Grille Faceted Ceiling 2-1/4" panels in Grille White with Backer

These warm, natural wood ceilings offer installation flexibility and a variety of design options.

## KEY SELECTION ATTRIBUTES

- 13 pre-designed panels with new slat heights and widths
- Custom slat sizes and finishes available for every project
- Now, painted White finish for maximum design flexibility
- Install in the ceiling, on the wall, or create 90° angled or faceted ceiling-to-wall transitions
- Easy installation with dowel or backer, or backer and dowel combination
- FSC® and Rainforest Alliance Certified wood options available

## FINISH SELECTION

Due to printing limitations, shade may vary from actual product.

NOTE: Panel backers are black. Custom backer colors available.

### SYSTEM INSTALLATION DETAILS

Ceiling Dowel Assembly

Ceiling Backer Assembly

Wall Backer Assembly

Slat sizes over 2-1/4" are not recommended for wall applications. Contact TechLine for details at 1 877 276-7876.

Screw Attachment Detail

NOTE: See Woodworks® Grille installation instructions for details on faceted and seismic installations.

### ACOUSTICAL PERFORMANCE

Noise Reduction Coefficient, or NRC, is a measure for rating the overall sound absorption of a material when used in an enclosed architectural space such as an office, where sound is reflected at many angles of incidence. WoodWorks® Grille has an NRC value of 0.85 when installed with a BioAcoustic™ infill panel 5823.

NRC is important in any closed space where reverberation time and noise levels are an issue:

- Closed offices, conference rooms
- Mixed plan office
- Lobby, reception, and work areas
- Classrooms/core learning areas, gymnasiums, cafeterias
- Retail spaces; checkout and other customer contact areas

Factors that may affect the installed acoustical performance relative to the published results are:

- Size of area
- Number of panels
- Layout of panels
- Suspension distance below exposed deck or finished ceiling
- Other surfaces in the space

	Ceiling	Exposed Structure (no Ceiling)	Ultima® (100% Ceiling)	WoodWorks Grille (100% Ceiling)
Reverberation Time (RT)		3.4 seconds	0.5 seconds	0.5 seconds
RT Improvement		N/A	85%	85%
Background Noise Reduction in Decibels (dB)		N/A	4.7dB	5.8dB

NOTE: You can calculate the acoustical difference that WoodWorks Grille panels can make in your space by using our online Reverb Calculator Tool at [armstrongceilings.com/reverbtool](http://armstrongceilings.com/reverbtool)

### PHYSICAL DATA

#### Material

Dowel, Slats, Backers, and Tegular panels – solid Poplar (yellow or hybrid).

#### Surface Finish

Clear or tinted semigloss coating on all finishes except Grille White (GWH). Grille White (GWH) has a lacquer finish.

#### Fire Performance

Solid Poplar (yellow or hybrid) Hardwood Slats and Backers  
Solid Poplar (yellow or hybrid) Hardwood Slats and Backers – Class C ASTM E84 surface burning characteristics. Flame Spread Index 200 or less. Smoke Developed Index 450 or less.

Fire performance will vary between wood species. Flame stop Class A coating available.

Class A intumescent treatment is available for all finishes except Grille White (GWH). Contact TechLine at 1 877 276-7876 for details.

These panels, as with other architectural features located at the ceiling, may obstruct or skew the planned fire sprinkler water distribution pattern, or possibly delay or accelerate the activation of the

sprinkler or fire detection systems by channeling heat from a fire either toward or away from the device. Consult a fire protection engineer, NFPA 13, and local codes for guidance where automatic fire detection and suppression systems are present.

#### Application Considerations

Variation among panels may occur due to the natural characteristics of the wood and grain.

#### Design Considerations

Custom slat and panel sizes available.

#### Backer & Dowel

For slat heights over 5", both Dowels and Backers are required for stability. Backer height is 1/2". Panel backers are black. Custom backer colors available.

#### Infill Panel Use

If no infill panel is used, unfinished parts of the suspension system and Axiom® trim will be visible from below.

#### Site Conditions

It is very important that panels be climatized prior to installation. Relative humidity between 25% and

55% and temperatures between 50°F and 86°F must be maintained.

#### Installation Consideration

When junction accessory is not used, the result will be a 1" gap between slat lengths.

#### Seismic Restraint

WoodWorks® Grille panels have been engineered, tested, and approved for application in all seismic areas when installed per Armstrong Ceilings installation instructions.

#### Warranty

Details at [armstrongceilings.com](http://armstrongceilings.com)

#### Weight

7263 – 0.8 lbs/per panel  
7264 – 1.1 lbs/per panel  
7094 – 1.4 lbs/per panel  
7265 – 1.3 lbs/per panel  
7266 – 1.8 lbs/per panel  
7097 – 1.9 lbs/per panel  
7095 – 2.1 lbs/per panel  
7091 – 1.6 lbs/per panel  
7092 – 1.9 lbs/per panel  
7098 – 2.5 lbs/per panel  
7096 – 2.7 lbs/per panel  
7093 – 2.1 lbs/per panel  
7099 – 3.1 lbs/per panel
