Infusions® accent canopies have been tested according to NFPA 286 and are equivalent to Class A Interior Finish as defined by the International Building Code.

Designers and Installers are advised to consult a fire protection engineer, NFPA 13, and local codes for guidance where automatic fire detection and suppression systems are present.

Contact TechLine at 1 877 276-7876 for specific US and Canadian fire performance data.

#### Design Considerations

Do not cut holes in or drill through Infusions® Accent Canopies. Doing so may cause the panel to bend in an irregular fashion.

Infusions panels are not approved for exterior application.

#### Installation Considerations

Do not allow the edges of the shapes to get wet or be exposed to moisture.

Infusions® accent canopies can be damaged by exposure to high temperatures. The temperature of the shapes should not be permitted to exceed 100°F.
