

# Project Spotlight

New Community Health Clinic gets Outfitted in Aviera and Mezzanine

## INSTALL FACTS:

**Sales Rep:** Eaton Group

**Dealer:** Office Equipment Co.

**Time Frame:** June- August 2014

**Product:** IDEON Aviera, Mezzanine

## ABOUT THE PROJECT

The Bullhook Community Medical Center is dedicated to offering affordable, patient-centered care to the community of Havre, Montana, empowering patients by giving them choices in their own medical care. The health center recently completed construction on a new clinic – a multi-million dollar facility with administrative offices and a pharmacy as well as a large medical and dental clinic. All these facilities needed comfortable, modern waiting room seating that was designed for healthcare. Aviera from IDEON was the perfect solution.

## WHAT MADE THE DIFFERENCE?

Garrett Edmonds from dealer Office Equipment Co. had a lot of experience working with multi-seating from other manufacturers. He had heard of, but not specc'd, the IDEON Aviera collection. He worked closely with sales representative Eaton Group to look at new solutions – ones specifically designed with healthcare in mind.

With the easy clean-out, the flexibility of modular seating and the vast choice of textiles, Aviera was ideal for the project. Decisions about seating were made without a designer, which meant that Garrett worked closely with decision-makers at the clinic to decide on the look and feel of the final products. They selected bright, cheery textiles for the seating to create a great atmosphere for the clinic.

Garrett also worked closely with them to coordinate the project on a tight deadline. In the end, the CEO was happy with the design choices and loved the Mezzanine tables that finished the look for the facility.

## WHAT'S NEXT

With the new facility drawing attention in the community, Aviera is getting a lot of traffic – and great feedback. And as the clinic welcomes more patients, Aviera and Mezzanine are sure to get healthy use and appreciation.
