Dorsal® Stack Chair

Round Leg

June 2018

TECHNICAL SPECIFICATIONS

Seat and Back

Un-upholstered chairs have a textured thermoplastic shell available in black or warm grey. Body contact areas have textured pattern. Upholstered chairs have fabric-covered, soft foam backrest and seat cushions fastened to an inner shell. Automatic mechanism governs backrest movement.

Optional Fixed Seat Cushion

Fixed seat cushion is factory-installed only and is replaceable. Urethane foam, 1" nominal thickness, is attached to an injection molded polypropylene liner board, then upholstered using a draw-string process and fastened to the poly seat with screws that have a clear zinc (silver color) finish.

Optional Fixed Back Cushion

Fixed back cushion is factory-installed only and is replaceable. Urethane foam, $\frac{3}{8}$ " nominal thickness, and an injection molded polypropylene liner board are upholstered using a draw-string process and are fastened to the poly shell with screws that match the poly color. The fastener heads are exposed from the back of the shell.

Round Leg Frame

Leg frame is made from two sections of 14-gauge by $\frac{3}{4}$ " O.D. seam-welded steel, joined into an integral unit by two die-formed steel crossbraces at the sides. Ganging models have steel knobs on the crossbrace at adjacent chair. Finish is either baked-on electrostatically-applied, 30 gloss epoxy powder-coat paint, or bright nickel-chrome plating.

Round Leg Glides

Replaceable self-leveling nylon base glides available in plastic, stainless, or non-skid.

Optional Ganging Elements

Ganging chairs use a "keyhole" system utilizing a steel knob on the crossbrace which locks into a slot in the adjacent chair's crossbrace. Ganging option recommended for chrome frame finish only.
