

# Rose™ Patient Chair

therapeutic motion | hygienic mesh fabric | light weight

Furnishing Knowledge®

Compatible with healthcare demands and designer expectations.

### The designers' choice.

The streamlined aesthetic of Rose chairs enhances virtually any healthcare environment. Many designers favor the sled base style with its simple cantilevered appearance.

Reduce the risk of injury to staff. Easily maneuver Rose chairs with the push bar on the seat back and the rear tilt wheels.

Optional upholstered seat and back covers are removable and easy to clean or replace with no downtime. The mesh structure enables the chair to remain in use. Headrest covers are also removable.

Options include mesh or upholstered seats and back; sled base, four-leg, round arm profile with polyurethane arm caps.

## Rose™ Patient Chair

Superior patient comfort. The Rose chair's distinctive dynamic motion therapeutically reduces anxiety and promotes circulation and relaxation.

Cool and dry, Rose's mesh seat and back provides air flow that wicks away perspiration and keeps patients cooler. This superior ventilation promotes skin integrity. Disinfectants can penetrate mesh fabric all the way through to promote infection control.

With a sleek, contemporary profile, compact footprint, and an emphasis on advanced, soothing, healthcare environments, the Rose patient chair successfully combines good looks with unparalleled therapeutic benefits.
